Additional Information**

**Dated December 15, 2025  
(as revised on January 22, 2026)**

The Twin Oak Enhanced Equity ETF, Twin Oak Enhanced Fixed Income ETF, Twin Oak Global Equity ETF, Twin Oak Strategic Solutions ETF and Twin Oak Hedged Opportunities ETF (each a “Fund” and together, the “Funds”) are each non-diversified series of The RBB Fund Trust (the “Trust”), an open-end management investment company organized as a Delaware statutory trust on August 29, 2014.

Twin Oak ETF Company (the “Adviser” or “Twin Oak”) serves as the investment adviser to the Funds, and Exchange Traded Concepts, LLC (the “Sub-Adviser”) serves as the investment sub-adviser to the Funds.

Information about the Funds is set forth in the Prospectus dated December 15, 2025 (as revised on January 22, 2026) (the “Prospectus”) and provides the basic information you should know before investing. To obtain a copy of the Prospectus and/or the Fund’s Annual and Semi-Annual Reports, once available, please write to Twin Oak ETFs, P.O. Box 701, Milwaukee, WI 53201-0701, or call 1-800-617-0004. This Statement of Additional Information (“SAI”) is not a prospectus but contains information in addition to and more detailed than that set forth in the Prospectus. It is incorporated by reference in its entirety into the Prospectus. This SAI is intended to provide you with additional information regarding the activities and operations of the Funds and the Trust, and it should be read in conjunction with the Prospectus.

## FUND HISTORY

The RBB Fund Trust (the “Trust”) is an open-end management investment company organized as a Delaware statutory trust on August 29, 2014. The Trust’s Amended and Restated Agreement and Declaration of Trust permits the Trust to offer separate series of shares of beneficial interest (each of which is a separate mutual fund) and separate classes of such series. Upon liquidation, shareholders of a series of the Trust are entitled to share pro rata in the net assets of such series available for distribution to shareholders. Expenses attributable to any series of the Trust are borne by that series.

The Trust is authorized to issue an unlimited number of interests (or shares) with no par value. Shares of each series have equal voting rights, and are voted in the aggregate and not by the series except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matter affects only the interest of a particular series. The Trust’s series may hold special meetings of shareholders to elect or remove Trustees of the Trust, change fundamental policies, approve a management contract, or for other purposes. The Trust’s series will mail proxy materials in advance of a shareholder meeting, including a proxy and information about the proposals to be voted on. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned. Fund shares do not have cumulative voting rights or any preemptive or conversion rights. The Trust does not normally hold annual meetings of shareholders. This SAI pertains to the shares representing interests in the Funds.

Each Fund offers and issues shares at its net asset value per share (“NAV”) only in aggregations of a specified number of shares (each a “Creation Unit”). Each Fund also generally offers and issues shares in exchange for a basket of securities (“Deposit Securities”) together with the deposit of a specified cash payment (“Cash Component”). The Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. The shares of the Funds are listed for trading on Cboe BZX Exchange, Inc. (the “Exchange”), and the Funds trade on the Exchange at market prices. These prices may differ from the shares’ NAVs. The shares are also redeemable only in Creation Unit aggregations, and generally in exchange for portfolio securities and a specified cash payment.

Shares of each Fund may be issued in advance of receipt of Deposit Securities subject to various conditions including a requirement to maintain on deposit with the Trust cash at least equal to a specified percentage of the market value of the missing Deposit Securities as set forth in the Participant Agreement (as defined below). The Trust may impose a transaction fee for each creation or redemption (the “Transaction Fee”). In all cases, such fees will be limited in accordance with the requirements of the Securities and Exchange Commission (the “SEC”) applicable to management investment companies offering redeemable securities. Each Fund may charge, either in lieu or in addition to the fixed creation or redemption Transaction Fee, a variable fee for creations and redemptions in order to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to the execution of trades resulting from such transaction, up to a maximum of 2.00% of the NAV per Creation Unit, inclusive of any Transaction Fees charged (if applicable).

Each Fund is an actively-managed exchange-traded fund (“ETF”).

## INVESTMENT POLICIES AND PRACTICES

Each Fund’s investment objective and principal investment strategies are described in the Prospectus. The sections below describe some of the different types of investments that may be made by each Fund. The following information supplements, and should be read in conjunction with, the Prospectus. To the extent an investment with respect to a Fund is discussed in this SAI but not in the Prospectus, such policy is not a principal investment of the Fund.

With respect to each Fund’s investments, unless otherwise noted, if a percentage limitation on investment is adhered to at the time of investment or contract, a subsequent increase or decrease as a result of market movement or redemption will not result in a violation of such investment limitation.

There can be no guarantee that a Fund will achieve its investment objective. Each Fund may not necessarily invest in all of the instruments or use all of the investment techniques permitted by the Prospectus and this SAI, or invest in such instruments or engage in such techniques to the full extent permitted by the Fund’s investment policies and limitations.

### Principal Investment Policies and Risks

**Affiliated Fund Risk.** When the Adviser invests Fund assets in an in other investment companies, including ETFs, (collectively, “Underlying Funds”) that is also managed by the Adviser, the risk presented is that, due to its own financial interest or other business considerations, the Adviser may have had an incentive to make that investment in lieu of investments by a Fund directly in portfolio securities, or in lieu of investment in Underlying Funds sponsored or managed by others. This conflict of interest may be amplified when an Underlying Fund has low assets.

**Cash Position Risk.** A Fund may hold any portion of its assets in cash, cash equivalents, or other short-term investments at any time or for an extended time. The Adviser will determine the amount of a Fund’s assets to be held in cash or cash equivalents at its sole discretion, based on such factors as it may consider appropriate under the circumstances. To the extent that a Fund holds assets in cash or is otherwise uninvested, the Fund’s ability to meet its objective may be limited.

**Currency Risk.** Changes in currency exchange rates affect the value of investments denominated in a foreign currency, and therefore the value of such investments in a Fund’s portfolio. A Fund’s NAV could decline if a currency to which the Fund has exposure depreciates against the U.S. dollar or if there are delays or limits on repatriation of such currency. The liquidity and trading value of foreign currencies could be affected by global economic factors, such as inflation, interest rate levels, and trade balances among countries, as well as the actions of sovereign governments and central banks. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may change quickly and without warning.

**Credit Risk.** Credit risk is the risk that fixed income securities in a Fund's portfolio will decline in price or that the issuer of a debt security (i.e., the borrower) will fail to make principal or interest payments when due or otherwise honor their obligations because the issuer of the security experiences a decline in its financial condition. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of a Fund's investment in that issuer.

**Counterparty Risk.** Some of the derivatives entered into by a Fund will not be traded on an exchange and instead will be privately negotiated in the over-the-counter market. This means that these instruments are traded between counterparties based on contractual relationships. Relying on a counterparty exposes a Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. A counterparty defaulting on its payment obligations to a Fund will cause the value of an investment in the Fund to decrease. If a Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. A Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of a Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by a Fund. When a Fund is required to post margin or other collateral with a counterparty, including with a futures commission merchant or a clearing organization for futures or other derivative contracts, the counterparty may fail to segregate the collateral or may commingle the collateral with the counterparty's own assets. In the event of the counterparty's bankruptcy or insolvency, a Fund's collateral may be subject to the conflicting claims of the counterparty's creditors and the Fund may be exposed to the risk of being treated as a general unsecured creditor of the counterparty, rather than as the owner of the collateral.

**Cyber Security Risk.** Each Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause a Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting the Funds, the Adviser, the Sub-Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Funds. For instance, cyber security breaches may interfere with the processing of shareholder transactions, impact a Fund's ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Funds to regulatory fines or financial losses and/or cause reputational damage. A Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which a Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such companies to lose value. While the Funds and their service providers have established information technology and data security programs and have in place business continuity plans and other systems designed to prevent losses and mitigate cyber security risk, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified or that cyber-attacks may be highly sophisticated. Furthermore, the Funds have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to the Funds, or the Adviser.

**Derivatives Risk.** A Fund may invest in derivative instruments that give exposure to equities, such as futures contracts, including futures contracts of U.S. indices. Rule 18f-4 under the 1940 Act provides for the regulation of a registered investment company's use of derivatives and related instruments. Rule 18f-4 prescribes specific value-at-risk leverage limits for certain derivatives users and requires certain derivatives users to adopt and implement a derivatives risk management program (including the appointment of a derivatives risk manager and the implementation of certain testing requirements), and prescribes reporting requirements in respect of derivatives. Subject to certain conditions, if a fund qualifies as a "limited derivatives user," as defined in Rule 18f-4, it is not subject to the full requirements of Rule 18f-4. As of the date of this Statement of Additional Information, the Fund is relying on the limited derivatives user exception.

With respect to reverse repurchase agreements or other similar financing transactions in particular, including certain tender option bonds, Rule 18f-4 permits a fund to enter into such transactions if the fund either (i) complies with the asset coverage requirements of Section 18 of the 1940 Act, and combines the aggregate amount of indebtedness associated with all reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the relevant asset coverage ratio, or (ii) treats all reverse repurchase agreements or similar financing transactions as derivatives transactions for all purposes under Rule 18f-4. Each Underlying Fund has adopted procedures for investing in derivatives and other transactions in compliance with Rule 18f-4. Limits or restrictions applicable to the counterparties or issuers, as applicable, with which an Underlying Fund may engage in derivative transactions could limit or prevent the Underlying Fund from using certain instruments.

The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

*Certain Investment Techniques and Derivatives Risks.* When the Adviser uses investment techniques such as futures contracts, an investment in a Fund may be more volatile than investments in other mutual funds or ETFs. Although the intention is to use such investment techniques and derivatives to minimize risk to the Fund, as well as for speculative purposes, there is the possibility that improper implementation of such techniques and derivative strategies or unusual market conditions could result in significant losses to the Fund. Derivatives are used to limit risk in the Underlying Fund or to enhance investment return and have a return tied to a formula based upon an interest rate, index, price of a security, or other measurement. Derivatives involve special risks, including: (1) the risk that interest rates, securities prices and currency markets will not move in the direction that a portfolio manager anticipates; (2) imperfect correlation between the price of derivative instruments and movements in the prices of the securities, interest rates or currencies being hedged; (3) the fact that skills needed to use these strategies are different than those needed to select portfolio securities; (4) the possible absence of a liquid secondary market for any particular instrument and possible exchange imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired; (5) the risk that adverse price movements in an instrument can result in a loss substantially greater than the Underlying Fund's initial investment in that instrument (in some cases, the potential loss is unlimited); (6) particularly in the case of privately-negotiated instruments, the risk that the counterparty will not perform its obligations, or that penalties could be incurred for positions held less than the required minimum holding period, which could leave the Underlying Fund worse off than if it had not entered into the position; and (7) the inability to close out certain hedged positions to avoid adverse tax consequences. In addition, the use of derivatives for non-hedging purposes (that is, to seek to increase total return) is considered a speculative practice and may present an even greater risk of loss than when used for hedging purposes.

*Futures Contracts.* Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific security at a specified future time and at a specified price. A Fund may reduce the risk that it will be unable to close out a futures contract by only entering into futures contracts that are traded on a national futures exchange regulated by the Commodities Futures Trading Commission ("CFTC"). A Fund may use futures contracts for: bona fide hedging; attempting to offset changes in the value of securities held or expected to be acquired or be disposed of; attempting to gain exposure to a particular market, index or instrument; or other risk management purposes. To the extent futures are employed by a Fund, the Fund will limit such investments in commodity futures to below the de minimis thresholds adopted by the CFTC in its recent amendments to Rule 4.5 (see below for a description of these thresholds). For this reason, the Adviser is not required to register as a "commodity pool operator" ("CPO") under the Commodity Exchange Act at this time.

An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made; generally, contracts are closed out prior to the expiration date of the contract.

**Equity Securities Risk.** Equity securities represent ownership interests in a company and consist of common stocks, preferred stocks, warrants to acquire common stock, and securities convertible into common stock. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the NAV of the Funds and Underlying Funds to fluctuate. The Fund purchases equity securities traded in the U.S. on registered exchanges or the over-the-counter market. Equity securities are described in more detail below:

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Warrants.** Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.
- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

- **Small-Cap and Mid Cap Stocks.** The Fund and Underlying Funds may invest in securities of companies with small- and mid-size capitalizations which tend to be riskier than securities of companies with large capitalizations. This is because small- and mid-cap companies typically have smaller product lines and less access to liquidity than large cap companies, and are therefore more sensitive to economic downturns. In addition, growth prospects of small- and mid-cap companies tend to be less certain than large cap companies, and the dividends paid on small- and mid-cap stocks are frequently negligible. Moreover, small- and mid-cap stocks have, on occasion, fluctuated in the opposite direction of large cap stocks or the general stock market. Consequently, securities of small- and mid-cap companies tend to be more volatile than those of large-cap companies. The market for small-cap securities may be thinly traded and as a result, greater fluctuations in the price of small-cap securities may occur.

**ETF Risk.** The Funds may hold shares of other open-end investment companies whose shares are listed for trading on a national securities exchange. ETF shares typically trade like shares of common stock and provide investment results that generally correspond to the price and yield performance of the component stocks of a widely recognized index. There can be no assurance, however, that this can be accomplished, as it may not be possible for an ETF to replicate the composition and relative weightings of the securities of its corresponding index. Additionally, some ETFs are actively-managed by an investment adviser and/or sub-advisers and do not seek to provide investment results that correspond to an index.

ETFs are subject to risks of an investment in a broadly based portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of such investment. An actively-managed ETF may not perform as well as its investment adviser and/or sub-advisers expect, and/or the actively-managed ETF's portfolio management practices might not work to achieve the desired result. Individual shares of an ETF are generally not redeemable at their NAV, but trade on an exchange during the day at prices that are normally close to, but not the same as, their NAV. There is no assurance that an active trading market will be maintained for the shares of an ETF or that market prices of the shares of an ETF will be close to their NAVs. The existence of extreme market volatility or potential lack of an active trading market for an ETF's shares could result in such shares trading at a significant premium or discount to their NAV. In addition, the purchase of shares of ETFs may result in duplication of expenses, including advisory fees, in addition to a mutual fund's or ETF's own expenses.

Investments in securities of ETFs beyond the limitations set forth in Section 12(d)(1)(A) of the 1940 Act are subject to certain terms and conditions described below. Section 12(d)(1)(A) states that a mutual fund may not acquire shares of other investment companies, such as ETFs, in excess of: 3% of the total outstanding voting stock of the investment company; 5% of its total assets invested in the investment company; or more than 10% of the fund's total assets were to be invested in the aggregate in all investment companies. The purchase of shares of ETFs may result in duplication of expenses, including advisory fees, in addition to a mutual fund's own expenses. Rule 12d1-4 under the 1940 Act ("Rule 12d1-4") allows funds to invest in other investment companies in excess of some of the limitations discussed above, subject to certain limitations and conditions. An acquiring fund relying on Rule 12d1-4 must enter into a fund of funds investment agreement with the acquired fund. Rule 12d1-4 outlines the requirements for fund of funds agreements and specifies certain reporting responsibilities of the acquiring fund's adviser. The Fund expects to rely on Rule 12d1-4 to the extent the Adviser deems such reliance necessary or appropriate.

**Fixed Income Securities Risk.** Fixed-income securities are subject to the risk of the issuer's inability to meet principal and interest payments on its obligations (i.e., credit risk) and are subject to price volatility resulting from, among other things, interest rate sensitivity, market perception of the creditworthiness of the issuer, willingness of broker-dealers and other market participants to make markets in the applicable securities, and general market liquidity (i.e., market risk). Lower rated fixed-income securities have greater volatility because there is less certainty that principal and interest payments will be made as scheduled. There is a risk that a lack of liquidity or other adverse credit market conditions may hamper the Fund's ability to sell the debt securities in which it invests.

**Floating Rate Securities Risk.** Floating rate securities are structured so that the security's coupon rate fluctuates based upon the level of a reference rate. In a falling interest rate environment, the coupon on floating rate securities will generally decline, causing a reduction in the fund's income. A floating rate security's coupon rate resets periodically according to the terms of the security. In a rising interest rate environment, floating rate securities with coupon rates that reset infrequently may lag behind the changes in market interest rates. Floating rate securities may also contain terms that impose a maximum coupon rate the issuer will pay decreasing the value of the security.

**Foreign Custody Risk.** The Global Equity ETF may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well-regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

**Foreign Securities Risk.** The Global Equity ETF may invest in equity and fixed-income securities of foreign companies, including companies located in both developed and emerging-market countries. Investment in foreign securities may include the purchase of American Depositary Receipts (“ADRs”) and other depositary receipts (European Depositary Receipts, Global Depositary Receipts and Non-Voting Depositary Receipts) that represent indirect interests in securities of foreign issuers. A significant portion of a Fund’s exposure to foreign investments may be composed of such investments. Investments in foreign securities are affected by risk factors generally not associated with investments in the securities of U.S. companies in the U.S. With respect to such securities, there may be more limited information publicly available concerning the issuer than would be the case with respect to domestic securities, foreign issuers may use different accounting standards, and foreign trading markets may not be as liquid as are U.S. markets. Foreign securities also involve such risks as currency risks, possible imposition of withholding or confiscatory taxes, possible currency transfer restrictions, expropriation or other adverse political or economic developments, and the difficulty of enforcing obligations in other countries. These risks may be greater in emerging-market countries and in less developed countries.

The purchase of securities denominated in foreign currencies will subject the value of the Fund’s investments in those securities to fluctuations caused by changes in foreign exchange rates. To hedge against the effects of changes in foreign exchange rates, the Funds may enter into forward foreign currency exchange contracts (“forward contracts”). These contracts represent agreements to exchange an amount of currency at an agreed-upon future date and rate. The Fund will generally use forward contracts only to “lock in” the price in U.S. dollars of a foreign security that the Fund plans to purchase or to sell, but in certain limited cases, they may use such contracts to hedge against an anticipated substantial decline in the price of a foreign currency against the U.S. dollar that would adversely affect the U.S. dollar value of foreign securities held by the Fund. Forward contracts will not be used in all cases and, in any event, cannot completely protect the Fund against all changes in the values of foreign securities resulting from fluctuations in foreign exchange rates. The Fund will not enter into a forward contract if, as a result, forward contracts would represent more than 20% of the Funds’ total assets. For hedging purposes, the Funds may also use options on foreign currencies, which expose the Funds to certain risks.

Some foreign securities are traded in the U.S. in the form of ADRs. ADRs are receipts typically issued by a U.S. bank or trust company evidencing ownership of the underlying securities of foreign issuers. European Depositary Receipts (“EDRs”) and Global Depositary Receipts (“GDRs”) are receipts typically issued by foreign banks or trust companies, evidencing ownership of underlying securities issued by either a foreign or U.S. issuer. Non-Voting Depositary Receipts (“NVDRs”) are listed securities through which investors receive the same financial benefits as those who invest directly in a company’s ordinary shares; however, unlike ordinary shareholders, NVDR holders cannot be involved in proxy voting if the company solicits votes from shareholders. Investments in NVDRs involve certain risks unique to foreign investments. Generally, depositary receipts in registered form are designed for use in the U.S. and depositary receipts in bearer form are designed for use in securities markets outside the U.S. Depositary receipts may not necessarily have the same currency denomination as the underlying securities into which they may be converted. Depositary receipts generally involve the same risks as do other investments in foreign securities. However, holders of ADRs and other depositary receipts may not have all the legal rights of shareholders and may experience difficulty in receiving shareholder communications.

European countries can be significantly affected by the tight fiscal and monetary controls that the European Economic and Monetary Union (“EMU”) imposes for membership. Europe’s economies are diverse, its governments are decentralized, and its cultures vary widely. Several European Union (“EU”) countries have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the euro and the accompanying coordination of fiscal and wage policy among EMU member countries. Member countries are required to maintain tight control over inflation, public debt, and budget deficit to qualify for membership in the EMU. These requirements can severely limit the ability of EMU member countries to implement monetary policy to address regional economic conditions.

In June 2016, the United Kingdom (the “UK”) approved a referendum to leave the EU. The withdrawal, known colloquially as “Brexit”, was agreed to and ratified by the UK Parliament, and the UK left the EU on January 31, 2020. It began an 11-month transition period in which to negotiate a new trading relationship for goods and services that ended on December 31, 2020. The UK and the EU signed the Trade and Cooperation Agreement (“TCA”) on December 30, 2020, which was applied provisionally as of January 1, 2021 and entered into force on May 1, 2021. The TCA is an agreement on the terms governing certain aspects of the relationship between the EU and the UK following the end of the transition period. Further discussions are to be held between the UK and the EU in relation to matters not covered by the trade agreement, such as financial services. Brexit may have significant political and financial consequences for the Eurozone markets, including greater volatility in the global stock markets and illiquidity, fluctuations in currency and exchange rates, and an increased likelihood of a recession in the UK. At this time, the impact of Brexit cannot be predicted, however, market disruption in the EU and globally may have a negative effect on the value of the Funds’ investments. Additionally, the risks related to Brexit could be more pronounced if one or more additional EU member states seek to leave the EU.

Recently, various countries have seen significant internal conflicts and in some cases, civil wars may have had an adverse impact on the securities markets of the countries concerned. In addition, the occurrence of new disturbances due to acts of war or terrorism or other political developments cannot be excluded. Nationalization, expropriation or confiscatory taxation, currency blockage, political changes, government regulation, political, regulatory or social instability or uncertainty or diplomatic developments, including the imposition of sanctions or other similar measures, could adversely affect the Funds' investments.

Recent examples of the above include conflict, loss of life and disaster connected to ongoing armed conflict between Russia and Ukraine in Europe and Hamas and Israel in the Middle East. The extent, duration and impact of these conflicts, related sanctions and retaliatory actions are difficult to ascertain, but could be significant and have severe adverse effects on the region, including significant adverse effects on the regional or global economies and the markets for certain securities and commodities. These impacts could negatively affect the Funds' investments in securities and instruments that are economically tied to the applicable region, and include (but are not limited to) declines in value and reductions in liquidity. In addition, to the extent new sanctions are imposed or previously relaxed sanctions are reimposed (including with respect to countries undergoing transformation), complying with such restrictions may prevent the Funds from pursuing certain investments, cause delays or other impediments with respect to consummating such investments or divestments, require divestment or freezing of investments on unfavorable terms, render divestment of underperforming investments impracticable, negatively impact the Funds' ability to achieve their investment objectives, prevent the Funds from receiving payments otherwise due, increase diligence and other similar costs to the Funds, render valuation of affected investments challenging, or require the Funds to consummate an investment on terms that are less advantageous than would be the case absent such restrictions. Any of these outcomes could adversely affect the Funds' performance with respect to such investments, and thus the Funds' performance as a whole.

Each Fund may invest a portion of its total assets in securities of companies that may be involved in special corporate situations, the occurrence of which would favorably affect the values of the companies' equity securities. Such situations could include, among other developments, a change in management or management policies; the acquisition of a significant equity position in the company by an investor or investor group; a merger, a reorganization, or the sale of a division; the spinoff of a subsidiary, division, or other substantial assets; or a third-party or issuer tender offer. The primary risk of this type of investing is that if the contemplated event does not occur or if a proposed transaction is abandoned, revised, or delayed or becomes subject to unanticipated uncertainties, the market price of the securities may decline below the purchase price the Fund paid.

In general, securities that are the subject of a special corporate situation sell at a premium to their market prices immediately following the announcement of the situation. However, the increased market price of these securities may nonetheless represent a discount from what the stated or appraised value of the security would be if the contemplated transaction were approved or consummated. These investments may be advantageous when the following occur: (1) the discount significantly overstates the risk of the contingencies involved; (2) the discount significantly undervalues the securities, assets, or cash to be received by shareholders of the prospective portfolio company as a result of the contemplated transactions; or (3) the discount fails adequately to recognize the possibility that the offer or proposal may be replaced or superseded by an offer or proposal of greater value. The evaluation of these contingencies requires unusually broad knowledge and experience on the part of the Adviser, which must appraise not only the value of the issuer and its component businesses as well as the assets or securities to be received as a result of the contemplated transaction, but also the financial resources and business motivation of the offer or, as well as the dynamics of the business climate when the offer or proposal is in progress.

A Fund's special corporate situation investments may tend to increase its portfolio turnover ratio and thereby increase brokerage commissions and other transaction expenses. However, the Adviser attempts to select investments of the type described that, in its view, also have a reasonable prospect of significant capital appreciation over the long term.

**Illiquid Securities Risk.** Pursuant to Rule 22e-4 ("Rule 22e-4" or the "Liquidity Rule") under the 1940 Act, each Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment as defined in Rule 22e-4 is an investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions within 7 calendar days or less without the sale or disposition significantly changing the market value of the investment. These investments may include restricted securities and repurchase agreements maturing in more than 7 days. Restricted securities are securities that may not be sold to the public without an effective registration statement under the Securities Act of 1933, as amended (the "1933 Act"), and thus may be sold only in privately negotiated transactions or pursuant to an exemption from registration. Subject to the adoption of guidelines by the Board, certain restricted securities that may be sold to institutional investors pursuant to Rule 144A under the 1933 Act and non-exempt commercial paper may be determined to be liquid by the Adviser. Illiquid investments involve the risk that the investments will not be able to be sold at the time the Adviser desires or at prices approximating the value at which a Fund is carrying the investments. To the extent an investment held by a Fund is deemed to be an illiquid investment or a less liquid investment, the Fund will be exposed to greater liquidity risk.

The Trust has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4. If the limitation on illiquid investments is exceeded, the condition will be reported to the Board and, when required by the Liquidity Rule, to the SEC.

**Income Risk.** A Fund's income may decline during periods of falling interest rates, when the Fund experiences defaults on debt securities it holds or when the Fund realizes a loss upon a sale of a debt security. The Fund's income declines when interest rates fall because, as the Fund's higher-yielding debt securities mature, are prepaid or are sold, the Fund may have to re-invest the proceeds in debt securities that have lower interest rates. The amount and rate of distributions that the Fund's shareholders receive are affected by the income that the Fund receives from its portfolio holdings. If the income is reduced, distributions by the Fund to shareholders may be less.

**Inflation and Deflation Risk.** Inflation risk is the risk that the value of assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of payments at future dates. Inflation rates may change frequently and significantly as a result of various factors, including unexpected shifts in the domestic or global economy and changes in economic policies, and the Fund's investments may not keep pace with inflation, which may result in losses to shareholders. As inflation increases, the real value of the Fund's Shares and distributions on those Shares can decline. In addition, during any periods of rising inflation, interest rates on any borrowings by the Fund would likely increase, which would tend to further reduce returns to the holders of Shares. Deflation risk is the risk that prices throughout the economy decline over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio and the value of the Shares.

**Interest Rate Risk.** Prices of fixed income securities rise and fall in response to changes in the interest rate paid by similar securities. Generally, when interest rates rise, prices of fixed income securities fall. However, market factors, such as the demand for particular fixed income securities, may cause the price of certain fixed income securities to fall while the prices of other securities rise or remain unchanged. Interest rate changes have a greater effect on the price of fixed income securities with longer durations. Duration measures the price sensitivity of a fixed income security to changes in interest rates.

Changing interest rates may have unpredictable effects on markets, may result in heightened market volatility and increased redemptions, and may detract from a Fund's performance to the extent the Fund is exposed to such interest rates and/or volatility. An increase in prevailing interest rates typically causes the value of existing debt securities to fall and often has a greater impact on longer-duration debt securities and higher quality debt securities. A general rise in interest rates may cause investors to move out of fixed income securities on a large scale, which could adversely affect the price and liquidity of fixed income securities and could also result in increased redemptions for the Funds. During periods when inflation rates are high or rising, the Funds may be subject to a greater risk of rising interest rates.

In a low or negative interest rate environment, debt securities may trade at, or be issued with, negative yields, which means the purchaser of the security may receive at maturity less than the total amount invested. In addition, in a negative interest rate environment, if a bank charges negative interest, instead of receiving interest on deposits, a depositor must pay the bank fees to keep money with the bank. To the extent the Fund holds a negatively yielding debt security or has a bank deposit with a negative interest rate, the Fund would generate a negative return on that investment. Cash positions may also subject the Fund to increased counterparty risk to the Fund's bank. Debt market conditions are highly unpredictable, and some parts of the market are subject to dislocations.

If low or negative interest rates become more prevalent in the market and/or if low or negative interest rates persist for a sustained period of time, some investors may seek to reallocate assets to other income-producing assets. This may cause the price of such higher yielding instruments to rise, could further reduce the value of instruments with a negative yield, and may limit the Fund's ability to locate fixed income instruments containing the desired risk/return profile. Changing interest rates, including rates that fall below zero, could have unpredictable effects on the markets and may expose fixed income markets to heightened volatility, increased redemptions, and potential illiquidity. In recent years, the Federal Reserve began implementing increases to the federal funds interest rate and there may be further rate increases. As the federal funds rate rises, interest rates across the financial system also may rise. To the extent interest rates increase substantially and/or rapidly, the Fund may be subject to significant losses.

**Investment Company Shares.** The Funds may hold shares of other investment companies to the extent permitted by applicable law and subject to certain restrictions. These investment companies typically incur fees that are separate from those fees incurred directly by the Fund. A Fund's purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying the Fund's expenses. Unless an exception is available, Section 12(d)(1)(A) of the 1940 Act prohibits a fund from (i) acquiring more than 3% of the voting shares of any one investment company, (ii) investing more than 5% of its total assets in any one investment company, and (iii) investing more than 10% of its total assets in all investment companies combined. These limits will not apply to the investment of uninvested cash balances in shares of registered or unregistered money market funds whether affiliated or unaffiliated. The foregoing exemption, however, only applies to an unregistered money market fund that (i) limits its investments to those in which a money market fund may invest under Rule 2a-7 of the 1940 Act, and (ii) undertakes to comply with all the other provisions of Rule 2a-7.

Each Fund may hold shares of other investment companies that seek to track the composition and/or performance of specific indexes or portions of specific indexes. Certain of these investment companies, known as ETFs, are traded on a securities exchange. The market prices of index-based investments will fluctuate in accordance with changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company's shares on the exchange upon which the shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things.

Investments by a Fund in other investment companies, including ETFs, will be subject to the limitations of the 1940 Act. Pursuant to Rule 12d1-4 and procedures approved by the Board, the Funds may invest in other investment companies beyond the limits contained in the 1940 Act, subject to certain conditions imposed by Rule 12d1-4 including limits on control and voting of acquired funds' shares, evaluations and findings by investment advisers, fund investment agreements and limits on most three-tier fund structures.

Certain investment companies whose securities are purchased by a Fund may not be obligated to redeem such securities in an amount exceeding 1% of the investment company's total outstanding securities during any period of less than 30 days. Therefore, such securities that exceed this amount may be illiquid.

**Large Shareholder Purchase and Redemption Risk.** Each Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell its securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large share purchases may adversely affect a Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. However, this risk may be limited to the extent that the Adviser and the Fund have entered into a fee waiver and/or expense reimbursement arrangement.

**Loans Risk.** Each Fund's ability to receive payments of principal and interest and other amounts in connection with loans (whether through participations, assignments or otherwise) will depend primarily on the financial condition of the borrower. The failure by a Fund to receive scheduled interest or principal payments on a loan because of a default, bankruptcy or any other reason would adversely affect the income of the Fund and would likely reduce the value of its assets. Even with loans secured by collateral, there is the risk that the value of the collateral may decline, may be insufficient to meet the obligations of the borrower, or be difficult to liquidate. In the event of a default, a Fund may have difficulty collecting on any collateral and would not have the ability to collect on any collateral for an uncollateralized loan.

**Management Risk.** As an actively managed investment portfolio, each Fund is subject to decisions made by the Adviser. The Adviser's investment decisions about individual securities impact a Fund's ability to achieve its investment objective. The Adviser's judgments about the attractiveness and potential returns for specific investments in which a Fund invests may prove to be incorrect and there is no guarantee that the Adviser's investment strategy will produce the desired results.

**Market Risk.** Overall market risks may also affect the value of the Funds. The market values of securities or other investments owned by the Fund will go up or down, sometimes rapidly or unpredictably. Factors such as economic growth and market conditions, interest rate levels, exchange rates and political events affect the securities markets. Changes in market conditions and interest rates generally do not have the same impact on all types of securities and instruments. Unexpected local, regional or global events and their aftermath, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; the spread of infectious illnesses or other public health issues; recessions and depressions; or other tragedies, catastrophes and events could have a significant impact on the Fund and its investments and could result in increased premiums or discounts to a Fund's NAV, which may impair market liquidity, thereby increasing liquidity risk. Such events can cause investor fear and panic, which can adversely affect the economies of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen. A Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected.

**Mortgage-Backed and Asset-Backed Securities Risk.** Investments in mortgage- and asset-backed securities are subject to prepayment or call risk, which is the risk that payments from the borrower may be received earlier than expected due to changes in the rate at which the underlying loans are prepaid. Securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. In addition, the potential impact of prepayment features on the price of a debt security can be difficult to predict and result in greater volatility.

**New Adviser Risk.** The Adviser has only recently begun serving as an investment adviser to ETFs. As a result, investors do not have a long-term track record of managing an ETF from which to judge the Adviser, and the Adviser may not achieve the intended result in managing the Fund.

**New Fund Risk.** Because each Fund is new, investors in each Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

**Non-Diversification Risk.** To the extent that a Fund holds securities of a smaller number of issuers or invests a larger percentage of its assets in a single issuer than a diversified portfolio, the value of the Fund, as compared to the value of a diversified portfolio, will generally be more volatile and more sensitive to the performance of any one of those issuers and to economic, political, market or regulatory events affecting any one of those issuers.

**Obligations of Domestic Banks, Foreign Banks and Foreign Branches of U.S. Banks.** Each Fund or an Underlying Fund may invest in obligations issued by banks and other savings institutions. Investments in bank obligations include obligations of domestic branches of foreign banks and foreign branches of domestic banks. Such investments in domestic branches of foreign banks and foreign branches of domestic banks may involve risks that are different from investments in securities of domestic branches of U.S. banks. These risks may include future unfavorable political and economic developments, possible withholding taxes on interest income, seizure or nationalization of foreign deposits, currency controls, interest limitations, or other governmental restrictions which might affect the payment of principal or interest on the securities held by the Fund or an Underlying Fund. Additionally, these institutions may be subject to less stringent reserve requirements and to different accounting, auditing, reporting and recordkeeping requirements than those applicable to domestic branches of U.S. banks. In addition, investments in bank loans may not be deemed to be securities and may not have the protections of the federal securities laws. Bank obligations include the following:

- **Bankers' Acceptances.** Bankers' acceptances are bills of exchange or time drafts drawn on and accepted by a commercial bank. Corporations use bankers' acceptances to finance the shipment and storage of goods and to furnish dollar exchange. Maturities are generally six months or less.
- **Certificates of Deposit.** Certificates of deposit are interest-bearing instruments with a specific maturity. They are issued by banks and savings and loan institutions in exchange for the deposit of funds and normally can be traded in the secondary market prior to maturity. Certificates of deposit with penalties for early withdrawal will be considered illiquid.
- **Time Deposits.** Time deposits are non-negotiable receipts issued by a bank in exchange for the deposit of funds. Like a certificate of deposit, it earns a specified rate of interest over a definite period of time; however, it cannot be traded in the secondary market. Time deposits with a withdrawal penalty or that mature in more than seven days are considered to be illiquid securities.

**Operational Risk.** The Funds are exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Funds' service providers, counterparties, or other third parties, failed or inadequate processes and technology or systems failures. Each Fund and its Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

#### **Options Risk.**

- *Buying or Purchasing Options Risk.* Buying options is a speculative activity and entails greater than ordinary investment risks. Many factors influence the price of an option, including the price of the reference asset, the time to expiration, the strike price, interest rates, and the dividend on the reference asset. As a result, the Fund's investment returns can be impacted by many variables outside the Adviser's direct control, and as those various factors fluctuate, the value of a purchased option can fluctuate by meaningful amounts. Additionally, in the event the reference price is not above the strike price for a call option or below the strike price for a put option at expiry, the option will expire worthless and the Fund will lose its invested premium. Furthermore, the value of the option may be lost if the Adviser fails to exercise such an option at or prior to its expiration. Although the potential for loss may be limited to the amount of premium paid, the value of your investment in a Fund could decline significantly without warning.
- *Selling or Writing Options Risk.* Writing option contracts can result in losses that exceed the seller's initial investment and may lead to additional turnover and higher tax liability. The Fund will incur a loss as a result of writing (selling) options (also known as a short option position) if the price of the written option instrument increases in value between the date the Fund writes the option and the date on which the Fund purchases an offsetting position or exits the option. The Fund's losses are potentially large in a written put transaction and potentially unlimited in a written call transaction.

**Risk Considerations of Lower Rated Securities.** A Fund may invest in fixed income securities that are not investment grade but are rated as low as B by Moody's or B by S&P (or their equivalents). In the event that the rating on a security held in an Underlying Fund's portfolio is downgraded by a rating service, such action may be considered by the Underlying Fund's investment adviser in its evaluation of the overall investment merits of that security, but will not necessarily result in the sale of the security. The widespread expansion of government, consumer and corporate debt within the U.S. economy has made the corporate sector, especially cyclically sensitive industries, more vulnerable to economic downturns or increased interest rates. An economic downturn could severely disrupt the market for high yield fixed income securities and adversely affect the value of outstanding fixed income securities and the ability of the issuers to repay principal and interest.

A Fund may invest in high yield debt obligations, such as bonds and debentures, issued by corporations and other business organizations. High yield fixed income securities (commonly known as “junk bonds”) are considered speculative investments while generally providing greater income than investments in higher rated securities, involve greater risk of loss of principal and income (including the possibility of default or bankruptcy of the issuers of such securities) and may involve greater volatility of price (especially during periods of economic uncertainty or change) than securities in the higher rating categories. Since yields vary over time, no specific level of income can ever be assured.

The prices of high yield fixed income securities have been found to be less sensitive to interest rate changes than higher-rated investments but more sensitive to adverse economic changes or individual corporate developments. Also, during an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress, which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals and to obtain additional financing. If the issuer of a fixed income security owned by an Underlying Fund defaulted, the Underlying Fund could incur additional expenses in attempting to obtain a recovery. In addition, periods of economic uncertainty and changes can be expected to result in increased volatility of market prices of high yield fixed income securities and a Fund’s NAV to the extent it holds such securities.

High yield fixed income securities also present risks based on payment expectations. For example, high yield fixed income securities may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, an Underlying Fund may, to the extent it holds such fixed income securities, have to replace the securities with a lower yielding security, which may result in a decreased return for investors. Conversely, a high yield fixed income security’s value will decrease in a rising interest rate market, as will the value of a Fund’s assets, to the extent it holds such fixed income securities. In addition, to the extent that there is no established retail secondary market, there may be thin trading of high yield fixed income securities, and this may have an impact on a Fund’s investment adviser’s ability to accurately value such securities and on a Fund’s ability to dispose of such securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of high yield fixed income securities, especially in a thinly traded market. New laws proposed or adopted from time to time may have an impact on the market for high yield securities.

Finally, there are risks involved in applying credit or dividend ratings as a method for evaluating high yield securities. For example, ratings evaluate the safety of principal and interest or dividend payments, not market value risk of high yield securities. Also, since rating agencies may fail to timely change the credit ratings to reflect subsequent events, an Underlying Fund may need to monitor the issuers of high yield securities in its portfolio, if any, to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments, and to assure the security’s liquidity so an Underlying Fund can meet redemption requests.

**Risk Considerations of Medium Grade Securities.** Debt obligations in the lowest investment grade (i.e., BBB or Baa), referred to as “medium grade” obligations, have speculative characteristics, and changes in economic conditions and other factors are more likely to lead to weakened capacity to make interest payments and repay principal on these obligations than is the case for higher rated securities. In the event that a security purchased by a Fund is subsequently downgraded below investment grade, the Adviser will consider such event in its determination of whether the Fund should continue to hold the security.

**Securities Lending Risk.** Each Fund may lend its portfolio securities to financial institutions. Such loans would involve risks of delay in receiving additional collateral in the event the value of the collateral decreases below the value of the securities loaned or of delay in recovering the securities loaned or even loss of rights in the collateral should the borrower of the securities fail financially. However, loans will be made only to borrowers which the Adviser deems to be of good standing and only when, in the Adviser’s judgment, the income to be earned from the loans justifies the attendant risks. Each Fund may not make loans in excess of  $33\frac{1}{3}\%$  of the value of its total assets. The Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated or, to the extent consistent with the 1940 Act or the rules and SEC interpretations thereunder, affiliated third party for acting as the Fund’s securities lending agent.

By lending its securities, a Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral. The Funds do not have the right to vote loaned securities. The Funds may attempt to call loaned securities back to permit the exercise of voting rights if time and jurisdictional restrictions permit. There is no guarantee that all loans can be recalled.

**Swap Risk.** The Funds may use swaps to enhance returns and manage risk. A Fund's use of swaps involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include: (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to a Fund. The use of leverage may also cause a Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leveraged derivatives can magnify a Fund's potential for loss and, therefore, amplify the effects of market volatility on the Fund's share price.

**Temporary Defensive Positions.** In anticipation of or in response to adverse market, economic, political or other conditions, each Fund may take temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and all types of money market and short-term debt securities. If a Fund were to take a temporary defensive position, it may be unable to achieve its investment objective for a period of time.

**U.S. Government Securities.** The Funds may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac"), Government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation ("Farmer Mac").

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Administration ("FHFA") acting as their conservator, since September 2008. The entities are dependent upon the continue support of the U.S. Department of the Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the values of their securities and the securities which they guarantee.

There is risk that the U.S. government will not provide financial support to its agencies, authorities, instrumentalities or sponsored enterprises. A Fund or an Underlying Fund may purchase U.S. government securities that are not backed by the full faith and credit of the United States, such as those issued by Fannie Mae and Freddie Mac. The maximum potential liability of the issuers of some U.S. government securities held by a Fund or an Underlying Fund may greatly exceed their current resources, including their legal right to support from the U.S. Treasury. It is possible that these issuers will not have the funds to meet their payment obligations in the future.

- **U.S. Treasury Obligations.** U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities (“STRIPS”) and Treasury Receipts (“TRs”).
- **Receipts.** Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian bank holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian bank arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.
- **U.S. Government Zero Coupon Securities.** STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.
- **U.S. Government Agencies.** Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of a Fund’s or an Underlying Fund’s shares.
- **Inflation-Protected Securities.** The Fund or an Underlying Fund may invest in inflation-protected securities issued by the U.S. Treasury, known as “TIPs” or “Treasury Inflation-Protected Securities,” which are debt securities whose principal and interest payments are adjusted for inflation and interest is paid on the adjusted amount. The inflation adjustment, which is typically applied monthly to the principal of the bond, follows a designated inflation index, such as the consumer price index. A fixed coupon rate is applied to the inflation-adjusted principal so that as inflation rises, both the principal value and the interest payments increase. This can provide investors with a hedge against inflation, as it helps preserve the purchasing power of the investment. Inflation-protected securities normally will decline in price when real interest rates rise. (A real interest rate is calculated by subtracting the inflation rate from a nominal interest rate. For example, if a 10-year Treasury note is yielding 5% and inflation is 2%, the real interest rate is 3%.) If inflation is negative, the principal and income of an inflation-protected security will decline and could result in losses for a Fund or an Underlying Fund.

Any increase in principal for an inflation-protected security resulting from inflation adjustments is considered by Internal Revenue Service regulations to be taxable income in the year it occurs. For direct holders of an inflation-protected security, this means that taxes must be paid on principal adjustments even though these amounts are not received until the bond matures. By contrast, an Underlying Fund holding these securities distributes both interest income and the income attributable to principal adjustments in the form of cash or reinvested shares, which are taxable to shareholders.

**Underlying Fund Market Price Risk.** The shares of Underlying Funds may trade at a discount or premium to their NAV. Historically, shares of Underlying Funds have frequently traded at a discount to their NAV, which discounts have, on occasion, been substantial and lasted for sustained periods of time. This is a risk separate and distinct from the risk that an Underlying Fund's NAV could decrease as a result of investment activities. Whether the Fund will realize gains or losses upon the sale of its shares of an Underlying Fund will depend not on the Underlying Fund's NAV, but entirely upon whether the market price of the Underlying Fund's shares at the time of sale is above or below the Fund's initial purchase price of the Underlying Fund.

**Underlying Funds Risk.** Each Fund may invest in shares of registered, closed-end or open-end investment companies and ETFs. Investments in ETFs are subject to the risks of the securities in which those investment companies invest. Your cost of investing in the Fund, as a fund that invests in Underlying Funds, may be higher than the cost of investing in a fund that only invests directly in individual securities. Fund shareholders will indirectly pay a portion of the operating costs of the Underlying Funds in addition to the expenses of a Fund's own operation. These costs include management, brokerage, shareholder servicing and other operational expenses. Unlike shares of typical mutual funds or unit investment trusts, shares of ETFs are designed to be traded throughout the trading day, bought and sold based on market prices rather than NAV. An investment in an ETF generally presents the following risks: (i) the same primary risks as an investment in a conventional mutual fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies; (ii) the risk that an ETF may fail to accurately track the market segment or index that underlies its investment objective; (iii) price fluctuation, resulting in a loss to the Fund; (iv) the risk that an ETF may trade at a discount to its NAV; (v) the risk that an active market for an ETF's shares may not develop or be maintained; and (vi) the risk that an ETF may no longer meet the listing requirements of any applicable exchanges on which that ETF is listed. The SEC has adopted revisions to the rules permitting funds to invest in other investment companies. These regulatory changes may adversely impact a Fund's investment strategies and operations.

**Valuation Risk.** The sale price a Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. Because non-U.S. exchanges may be open on days when the Funds do not price their Shares, the value of the securities or assets in a Fund's portfolio may change on days when investors will not be able to purchase or sell the Fund's Shares. A Fund relies on various sources to calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise.

### **Non-Principal Investment Policies and Risks**

**Commercial Paper.** Commercial paper is the term used to designate unsecured short-term promissory notes issued by corporations and other entities. Maturities on these issues vary from a few to 270 days.

**Corporate Obligations.** A Fund may invest in debt obligations, such as bonds and debentures, issued by corporations and other business organizations without limit on credit quality or maturity. See Appendix "A" to this SAI for a description of corporate debt ratings. An issuer of debt obligations may default on its obligation to pay interest and repay principal. Also, changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value.

**Depository Receipts Risk.** ADRs are generally subject to the same risks as the foreign securities that they evidence or into which they may be converted. In addition, the underlying issuers of certain ADRs, particularly unsponsored ADRs, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. ADRs that are not sponsored by the issuer may be less liquid and there may be less readily available public information about the issuer. Sponsored ADRs are established jointly by a depository and the underlying issuer, whereas unsponsored ADRs may be established by a depository without participation by the underlying issuer. Holders of an unsponsored ADRs generally bear all the costs associated with establishing the unsponsored ADRs. In addition, the issuers of the securities underlying unsponsored ADRs are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding those issuers and there may not be a correlation between that information and the market value of the ADR.

**Economic, Markets, and Geopolitical Risk.** Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular sector or geographic area, have occurred in the past and may be expected to recur in the future. Some countries, including the United States, have adopted or have signaled protectionist trade measures, relaxation of the financial industry regulations that followed the financial crisis, and/or reductions to corporate taxes. The scope of these policy changes is still developing, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, particularly if a resulting policy runs counter to the market's expectations. The outcome of such changes cannot be foreseen at the present time. In addition, geopolitical and other risks, including events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact the Funds and their investments. As a result of increasingly interconnected global economies and financial markets, the value and liquidity of a Fund's investments may be negatively affected by events impacting a country or region, regardless of whether a Fund invests in issuers located in or with significant exposure to such country or region.

Disease outbreaks that affect local economies or the global economy may materially and adversely impact a Fund and/or the Adviser's business. For example, uncertainties regarding the COVID-19 outbreak have resulted in serious economic disruptions across the globe. Recent events are impacting the securities markets. Governmental authorities and regulators throughout the world, such as the U.S. Federal Reserve, have in the past responded to major economic disruptions with changes to fiscal and monetary policy, including but not limited to, direct capital infusions, new monetary programs, and interest rates changes. Such policy changes may adversely affect the value, volatility and liquidity of dividend and interest paying securities.

In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in a Fund being, among other things, unable to buy or sell certain securities or financial instruments or to accurately price its investments. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets. To the extent a Fund may overweight its investments in certain countries, companies, industries or market sectors, such position will increase a Fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors. These conditions could result in a Fund's inability to achieve its investment objectives, cause the postponement of reconstitution or rebalance dates for benchmark indices, adversely affect the prices and liquidity of the securities and other instruments in which a Fund invests, negatively impact a Fund's performance, and cause losses on your investment in a Fund.

Additionally, U.S. and global markets recently have experienced increased volatility, including the recent failures of certain U.S. and non-U.S. banks, which could be harmful to the Fund and issuers in which they invest. Conditions in the banking sector are evolving, and the scope of any potential impacts to the Funds and issuers, both from market conditions and also potential legislative or regulatory responses, are uncertain. Continued market volatility and uncertainty and/or a downturn in market and economic and financial conditions, as a result of developments in the banking industry or otherwise (including as a result of delayed access to cash or credit facilities), could have an adverse impact on the Funds and issuers in which they invest.

**Emerging & Foreign Markets Risk.** Global Equity ETF may invest in securities of issuers located in emerging markets. Securities in emerging markets are less liquid and subject to greater price volatility, and have a smaller market capitalization, than the U.S. securities markets. In certain countries, there may be fewer publicly traded securities and the market may be dominated by a few issues or sectors. Issuers and securities markets in such countries are not subject to as extensive and frequent accounting, financial and other reporting requirements or as comprehensive government regulations as are issuers and securities markets in the U.S. In particular, the assets and profits appearing on the financial statements of emerging country issuers may not reflect their financial position or results of operations in the same manner as financial statements for U.S. issuers. Substantially less information may be publicly available about emerging market issuers than is available about issuers in the United States.

Emerging markets are typically marked by a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of ownership of such securities by a limited number of investors. Certain emerging markets are in the earliest stages of their development. Even the markets for relatively widely traded securities in emerging markets may not be able to absorb, without price disruptions, a significant increase in trading volume or trades of a size customarily undertaken by institutional investors in the securities markets of developed countries. The limited size of many of these markets can cause prices to be erratic for reasons apart from factors that affect the soundness and competitiveness of the securities issuers. For example, prices may be unduly influenced by traders who control large positions in these markets. Additionally, market making and arbitrage activities are generally less extensive in such markets, which may contribute to increased volatility and reduced liquidity of such markets. The limited liquidity of emerging country securities may also affect the Fund's ability to value accurately its portfolio securities or to acquire or dispose of securities at the price and time it wishes to do so or in order to meet redemption requests.

Antiquated legal systems in certain emerging markets may have an adverse impact on a Fund's investments. For example, while the potential liability of a shareholder in a U.S. corporation for acts of the corporation is generally limited to the amount of the shareholder's investment, the notion of limited liability is less clear in certain emerging markets. Similarly, the rights of investors in emerging market companies may be more limited than those of shareholders in U.S. corporations, the legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S. and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.

Transaction costs, including brokerage commissions or dealer mark-ups, in emerging markets may be higher than in the United States and other developed securities markets. In addition, existing laws and regulations are often inconsistently applied. As legal systems in emerging countries develop, foreign investors may be adversely affected by new or amended laws and regulations. In circumstances where adequate laws exist, it may not be possible to obtain swift and equitable enforcement of the law.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees. These restrictions may limit an Underlying Fund's investment in certain emerging countries and may increase the expenses of the Underlying Fund and, consequently, the Fund. Certain emerging countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the company available for purchase by nationals. In addition, the repatriation of both investment income and capital from emerging countries may be subject to restrictions which require governmental consents or prohibit repatriation entirely for a period of time. Even where there is no outright restriction on repatriation of capital, the mechanics of repatriation may affect certain aspects of the operation of an Underlying Fund. An Underlying Fund may be required to establish special custodial or other arrangements before investing in certain emerging countries.

Emerging countries may be subject to a substantially greater degree of economic, political and social instability than is the case in the United States and most Western European countries. This instability may result from, among other things, the following: (i) authoritarian governments or military involvement in political and economic decision making, including changes or attempted changes in governments through extra-constitutional means; (ii) popular unrest associated with demands for improved conditions; (iii) internal insurgencies; (iv) hostile relations with neighboring countries; (v) ethnic, religious and racial disaffection or conflict; and (vi) the absence of developed legal structures governing foreign private investments and private property. Such economic, political and social instability could disrupt the principal financial markets in which an Underlying Fund may invest and adversely affect the value of the Fund's assets. The Fund's investments can also be adversely affected by any increase in taxes or by political, economic or diplomatic developments.

The economies of emerging countries may differ unfavorably from the U.S. economy in growth of gross domestic product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payments. Many emerging countries have experienced in the past, and continue to experience, high rates of inflation. In certain countries, inflation has at times accelerated rapidly to hyperinflationary levels, creating a negative interest rate environment and sharply eroding the value of outstanding financial assets in those countries. Other emerging countries, on the other hand, have recently experienced deflationary pressures and are in economic recessions. The economies of many emerging countries are heavily dependent upon international trade and are accordingly affected by protective trade barriers and the economic conditions of their trading partners. In addition, the economies of some emerging countries are vulnerable to weakness in world prices for their commodity exports. An Underlying Fund's income and, in some cases, capital gains from foreign stocks and securities will be subject to applicable taxation in certain of the countries in which it invests, and treaties between the U.S. and such countries may not be available in some cases to reduce the otherwise applicable tax rates.

**Forward Foreign Currency Contracts.** Global Equity ETF is authorized to enter into forward foreign currency contracts. These contracts represent agreements to exchange an amount of currency at an agreed-upon future date and rate. The rate can be higher or lower than the spot rate between the currencies that are the subject of the contract. A forward contract generally has no deposit requirement, and such transactions do not involve commissions. By entering into a forward contract for the purchase or sale of the amount of foreign currency invested in an equity or fixed-income security of a foreign issuer (a “foreign security”), a Fund can hedge against possible variations in the value of the dollar versus the subject currency either between the date the foreign security is purchased or sold and the date on which payment is made or received (“transaction hedging”), or during the time the Fund holds the foreign security (“position hedging”). Hedging against a decline in the value of a currency through the use of forward contracts does not eliminate fluctuations in the prices of securities or prevent losses if the prices of securities decline. Hedging transactions precludes the opportunity for gain if the value of the hedged currency should rise. A Fund will not speculate in forward currency contracts. If a Fund enters into a position-hedging transaction, which is the sale of forward non-U.S. currency with respect to a security held by it and denominated in such foreign currency, the Company’s custodian will place cash or liquid securities in a separate account in an amount equal to the value of the Fund's total assets committed to the consummation of such forward contract. If the value of the securities placed in the account declines, additional cash or securities will be placed in the account so that the value of cash or securities in the account will equal the amount of the Funds’ commitments with respect to such contracts. Forward contracts will not be used in all cases and, in any event, cannot completely protect the Funds against all changes in the values of foreign securities resulting from fluctuations in foreign exchange rates.

**High Portfolio Turnover Risk.** Each Fund may actively and frequently trade all or a significant portion of the Fund’s holdings. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

**Initial Public Offerings.** To the extent consistent with its investment policies and limitations, each Fund or an Underlying Fund may purchase stock in an initial public offering (“IPO”). An IPO is a company’s first offering of stock to the public. Risks associated with IPOs may include considerable fluctuation in the market value of IPO shares due to certain factors, such as the absence of a prior public market, unseasoned trading, a limited number of shares available for trading, lack of information about the issuer and limited operating history. The purchase of IPO shares may involve high transaction costs. When the Fund’s or an Underlying Fund’s asset base is small, a significant portion of the Fund’s or Underlying Fund’s performance could be attributable to investments in IPOs, because such investments would have a magnified impact on the underlying investment company. As the Fund’s or an Underlying Fund’s assets grow, the effect of the Fund’s or Underlying Fund’s investments in IPOs on the Fund’s or Underlying Fund’s performance probably will decline, which could reduce the Fund’s or Underlying Fund’s performance. Because of the price volatility of IPO shares, the Fund or an Underlying Fund may choose to hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s or an Underlying Fund’s portfolio and may lead to increased expenses to the Fund or an Underlying Fund, such as commissions and transaction costs. In addition, the Fund or an Underlying Fund cannot guarantee continued access to IPOs.

**Money Market Securities.** During unusual economic or market conditions, or for temporary defensive or liquidity purposes, each Fund may invest up to 100% of its assets in money market instruments that would not ordinarily be consistent with the Fund’s objective. For purposes of these policies, money market securities include (i) short-term U.S. government securities, including custodial receipts evidencing separately traded interest and principal components of securities issued by the U.S. Treasury; (ii) commercial paper rated in the highest short-term rating category by a nationally recognized statistical ratings organization (“NRSRO”), such as S&P Global Ratings (“S&P”) or Moody’s Investors Service (“Moody’s”), or determined by the Adviser to be of comparable quality at the time of purchase; (iii) short-term bank obligations (certificates of deposit, time deposits and bankers’ acceptances) of U.S. domestic banks, foreign banks and foreign branches of domestic banks, and commercial banks with assets of at least \$1 billion as of the end of their most recent fiscal year; and (iv) repurchase agreements involving such securities. Each of these types of money market securities is discussed in more detail below. For a description of ratings, see Appendix A to this SAI.

**Repurchase Agreements.** Each Fund may enter into repurchase agreements with financial institutions. A repurchase agreement is an agreement under which the Fund acquires a fixed income security (generally a security issued by the U.S. government or an agency thereof, a banker's acceptance, or a certificate of deposit) from a commercial bank, broker, or dealer, and simultaneously agrees to resell such security to the seller at an agreed upon price and date (normally, the next business day). Because the security purchased constitutes collateral for the repurchase obligation, a repurchase agreement may be considered a loan that is collateralized by the security purchased. The acquisition of a repurchase agreement may be deemed to be an acquisition of the underlying securities as long as the obligation of the seller to repurchase the securities is collateralized fully. The Fund follows certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with creditworthy financial institutions whose condition will be continually monitored by the Adviser. The repurchase agreements entered into by the Fund will provide that the underlying collateral at all times shall have a value at least equal to 102% of the resale price stated in the agreement and consist only of securities permissible under Section 101(47)(A)(i) of the Bankruptcy Code (the Adviser monitors compliance with this requirement). Under all repurchase agreements entered into by a Fund, the custodian or its agent must take possession of the underlying collateral. In the event of a default or bankruptcy by a selling financial institution, the Fund will seek to liquidate such collateral. However, the exercising of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. It is the current policy of the Fund not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by that Fund, amounts to more than 15% of the Fund's total assets. The investments of the Fund in repurchase agreements, at times, may be substantial when, in the view of the Adviser, liquidity or other considerations so warrant.

**Reverse Repurchase Agreements.** Each Fund may enter into reverse repurchase agreements with respect to portfolio securities for temporary purposes (such as to obtain cash to meet redemption requests) when the liquidation of portfolio securities is deemed disadvantageous or inconvenient by the Adviser. Reverse repurchase agreements involve the sale of securities held by the Fund subject to the Fund's agreement to repurchase the securities at an agreed-upon price, date and rate of interest. Such agreements may be considered borrowings under the 1940 Act and may be entered into only for temporary or emergency purposes. Reverse repurchase agreements involve the risk that the market value of the securities sold by a Fund may decline below the price of the securities the Fund is obligated to repurchase and the interest received on the cash exchanged for the securities.

**Rights Offerings and Purchase Warrants.** Rights offerings and purchase warrants are privileges issued by a corporation which enable the owner to subscribe to and purchase a specified number of shares of the corporation at a specified price during a specified period of time. Subscription rights normally have a short lifespan to expiration. The purchase of rights or warrants involves the risk that a Fund could lose the purchase value of a right or warrant if the right to subscribe to additional shares is not executed prior to the right's or warrant's expiration. Also, the purchase of rights and/or warrants involves the risk that the effective price paid for the right and/or warrant added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the level of the underlying security.

**Special Situation Companies.** Each Fund or an Underlying Fund may invest in "Special Situations." The term "Special Situation" shall be deemed to refer to a security of a company in which an unusual and possibly non-repetitive development is taking place which, in the opinion of the Adviser or the Underlying Fund's investment adviser, may cause the security to attain a higher market value independently, to a degree, of the trend in the securities market in general. The particular development (actual or prospective), which may qualify a security as a Special Situation, may be one of many different types.

Such developments may include, among others, a technological improvement or important discovery or acquisition which, if the expectation for it materialized, would effect a substantial change in the company's business; a reorganization; a recapitalization or other development involving a security exchange or conversion; a merger, liquidation or distribution of cash, securities or other assets; a breakup or workout of a holding company; litigation which, if resolved favorably, would improve the value of the company's stock; a new or changed management; or material changes in management policies. A Special Situation may often involve a comparatively small company, which is not well known, and which has not been closely watched by investors generally, but it may also involve a large company. The fact, if it exists, that an increase in the company's earnings, dividends or business is expected, or that a given security is considered to be undervalued, would not in itself be sufficient to qualify as a Special Situation. Each Fund or an Underlying Fund may invest in securities (even if not Special Situations) which, in the opinion of its investment adviser, are appropriate investments for a Fund or Underlying Fund, including securities which the investment adviser believes are undervalued by the market. Each Fund and Underlying Funds are not required to invest any minimum percentage of their aggregate portfolio in "Special Situations," nor are they required to invest any minimum percentage of their aggregate portfolio in securities other than "Special Situations."

**RIC Compliance Risk.** Each Fund intends to elect to be, and intends to qualify each year for treatment as, a regulated investment company (“RIC”) under Subchapter M of Subtitle A, Chapter 1, of the Internal Revenue Code of 1986, as amended (the “Code”). To qualify for federal income tax treatment as a RIC, a Fund must meet certain source-of-income, asset diversification and annual distribution requirements. If for any taxable year a Fund fails to qualify for the special federal income tax treatment afforded to RICs, all of the Fund’s taxable income will be subject to federal income tax at regular corporate rates (without any deduction for distributions to its shareholders) and its income available for distribution will be reduced. Under certain circumstances, a Fund could cure a failure to qualify as a RIC, but in order to do so, the Fund could incur significant Fund-level taxes and could be forced to dispose of certain assets.

## INVESTMENT RESTRICTIONS

The Trust has adopted the following investment restrictions as fundamental policies with respect to the Funds. These restrictions cannot be changed with respect to a Fund without the approval of the holders of a majority of the Fund’s outstanding voting securities. For the purposes of the 1940 Act, a “majority of outstanding shares” means the vote of the lesser of: (1) 67% or more of the voting securities of the Fund present at the meeting if the holders of more than 50% of the Fund’s outstanding voting securities are present or represented by proxy; or (2) more than 50% of the outstanding voting securities of the Fund.

Except with the approval of a majority of the outstanding voting securities, each Fund may not:

1. Borrow money or issue senior securities, except that the Fund may borrow from banks and enter into reverse repurchase agreements provided that there is at least 300% asset coverage for the borrowings of the Fund. The Fund may not mortgage, pledge or hypothecate any assets, except in connection with any such borrowing and then in amounts not in excess of one-third of the value of the Fund’s total assets at the time of such borrowing. However, the amount shall not be in excess of lesser of the dollar amounts borrowed or 33 1/3% of the value of the Fund’s total assets at the time of such borrowing, provided that: (a) short sales and related borrowings of securities are not subject to this restriction; and (b) for the purposes of this restriction, collateral arrangements with respect to options, short sales, futures contracts, options on futures contracts, collateral arrangements with respect to initial and variation margin and collateral arrangements with respect to derivatives instruments are not deemed to be a pledge or other encumbrance of assets. Securities held in escrow or separate accounts in connection with the Fund’s investment practices are not considered to be borrowings or deemed to be pledged for purposes of this limitation;
2. Act as an underwriter of securities within the meaning of the 1933 Act, except insofar as it might be deemed to be an underwriter upon disposition of certain portfolio securities acquired within the limitation on purchases of restricted securities;
3. Purchase or sell real estate (including real estate limited partnership interests), provided that the Fund may invest: (a) in securities secured by real estate or interests therein or issued by companies that invest in real estate or interests therein; or (b) in real estate investment trusts;
4. Purchase or sell commodities or commodity contracts, except as permitted by the 1940 Act, as amended, and as interpreted or modified by the regulatory authority having jurisdiction from time to time;

5. Make loans, except through loans of portfolio securities and repurchase agreements, provided that for purposes of this restriction the acquisition of bonds, debentures or other debt instruments or interests therein and investment in government obligations, loan participations and assignments, short-term commercial paper, certificates of deposit and bankers' acceptances shall not be deemed to be the making of a loan;
6. Purchase securities of one or more issuers conducting their principal business activity in the same industry or group of industries, if immediately after such purchase the value of its investments in such industry would exceed 25% or more of its total assets provided that this restriction shall not apply to securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities; provided, however, that the Fund may invest all or part of its investable assets in an open-end investment company with substantially the same investment objective, policies and restrictions as the Fund.

In addition to the fundamental investment limitations specified above, each Fund is subject to the following non-fundamental limitations, which may be changed without shareholder approval, in compliance with applicable law and regulatory policy. The Fund may not:

1. Acquire any illiquid asset if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid assets. An illiquid asset is any asset which may not be sold or disposed of in the ordinary course of business within seven days at approximately the value at which the Fund has valued the investment.

Each Fund may invest in securities issued by other investment companies within the limits prescribed by the 1940 Act. As a shareholder of another investment company, a Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory and other expenses that a Fund bears directly in connection with its own operations. For purposes of Investment Restriction Number 6, a Fund will look through to the underlying investments of any acquired open-end investment company for purposes of complying with its policy.

Securities held by a Fund generally may not be purchased from, sold or loaned to the Adviser or its affiliates or any of their directors, officers or employees, acting as principal, unless pursuant to a rule or exemptive order under the 1940 Act.

If a percentage restriction under one of the Fund's investment policies or limitations or the use of assets is adhered to at the time a transaction is effected, later changes in percentages resulting from changing values will not be considered a violation (except with respect to any restrictions that may apply to borrowings or senior securities issued by the Fund).

## **EXCHANGE LISTING AND TRADING**

Shares are listed for trading and trade throughout the day on the Exchange.

There can be no assurance that a Fund will continue to meet the requirements of the Exchange necessary to maintain the listing of shares. The Exchange will consider the suspension of trading in, and will initiate delisting proceedings of, the shares of a Fund under any of the following circumstances: (i) if any of the requirements set forth in the Exchange rules are not continuously maintained; (ii) if the Exchange files separate proposals under Section 19(b) of the 1940 Act and any of the statements regarding (a) the description of the Fund; (b) limitations on the Fund's portfolio holdings or reference assets; (c) dissemination and availability of the intraday indicative values; or (d) the applicability of the Exchange listing rules specified in such proposals are not continuously maintained; (iii) if, following the initial 12-month period beginning at the commencement of trading of the Fund, there are fewer than 50 beneficial owners of shares of the Fund; (iv) if the intraday indicative value is no longer disseminated at least every 15 seconds during the Exchange's regular market session and the interruption to the dissemination persists past the trading day in which it occurred; or (v) such other event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares from listing and trading upon termination of the Fund.

The Trust reserves the right to adjust the price levels of its shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Funds.

As in the case of other stocks traded on the Exchange, broker's commissions on transactions will be based on negotiated commission rates at customary levels.

## MANAGEMENT OF THE TRUST

The business and affairs of the Trust are managed under the oversight of the Board, subject to the laws of the State of Delaware and the Trust's organizational documents. The Trustees are responsible for deciding matters of overall policy and overseeing the actions of the Trust's service providers. The officers of the Trust conduct and supervise the Trust's daily business operations.

Trustees who are not deemed to be "interested persons" of the Trust (as defined in the 1940 Act) are referred to as "Independent Trustees." Trustees who are deemed to be "interested persons" of the Trust are referred to as "Interested Trustees." The Board is currently composed of five Independent Trustees and two Interested Trustees. The Board has selected Arnold M. Reichman, an Independent Trustee, to act as Chair. Mr. Reichman's duties include presiding at meetings of the Board and interfacing with management to address significant issues that may arise between regularly scheduled Board and Committee meetings. In the performance of his duties, Mr. Reichman will consult with the other Independent Trustees and the Trust's officers and legal counsel, as appropriate. The Chair may perform other functions as requested by the Board from time to time.

The Board meets as often as necessary to discharge its responsibilities. Currently, the Board conducts regular, in-person meetings at least four times a year, and holds special in-person or telephonic meetings as necessary to address specific issues that require attention prior to the next regularly scheduled meeting. The Board also relies on professionals, such as the Trust's independent registered public accounting firms and legal counsel, to assist the Trustees in performing their oversight responsibilities.

The Board has established seven standing committees — Audit, Contract, Executive, Nominating and Governance, Product Development, Regulatory Oversight, and Valuation Committees. The Board may establish other committees, or nominate one or more Trustees to examine particular issues related to the Board's oversight responsibilities, from time to time. Each Committee meets periodically to perform its delegated oversight functions and reports its findings and recommendations to the Board. For more information on the Committees, see the section entitled "Standing Committees."

The Board has also established an Advisory Board whose members are not "interested persons" of the Trust (as defined in the 1940 Act) and who serve in a consultative capacity to the Board, providing nonbinding advice to the Board regarding the oversight of the affairs of the Trust (each, an "Advisory Board Member"). An Advisory Board Member participates in Board discussions and reviews Board materials relating to the Funds, but is not a Trustee, has no power to vote on any matter presented to the Board, and has no power to act on behalf of or otherwise bind the Board, the Trustees or any committee of the Board. The Board appointed Eugene Podsiadlo as an Advisory Board Member effective October 1, 2025.

The Board has determined that the Trust's leadership structure is appropriate because it allows the Board to effectively perform its oversight responsibilities.

### Trustees, Advisory Board Members, and Executive Officers

The Trustees, advisory board members, and executive officers of the Trust, their ages, business addresses and principal occupations during the past five years are set forth in this section.

Name, Address, and Age	Position(s) Held with Trust	Term of Office and Length of Time Served <sup>(1)</sup>	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee*	Other Directorships Held by Trustee
<b>INDEPENDENT TRUSTEES</b>					
Gregory P. Chandler 615 East Michigan Street Milwaukee, WI 53202 Age: 58	Trustee	June 2021 to present	Since 2020, Chief Financial Officer, HC Parent Corp. d/b/a Herspiegel Consulting LLC (life sciences consulting services); 2020, Chief Financial Officer, Avocado Systems Inc. (cyber security software provider); from 2009-2020, Chief Financial Officer, Emtec, Inc. (information technology consulting/services).	124	FS Energy and Power Fund (business development company); Wilmington Funds (12 portfolios) (registered investment company); Emtec, Inc. (until December 2019); FS Investments Corporation (business development company) (until December 2018).

Lisa A. Dolly 615 East Michigan Street Milwaukee, WI, 53202 Age: 58	Trustee	October 2021 to present	From July 2019-December 2019, Chair, Pershing LLC (broker dealer, clearing and custody firm); January 2016-June 2019, Chief Executive Officer, Pershing, LLC.	124	Allfunds Group PLC (United Kingdom wealthtech and fund distribution provider); Securities Industry and Financial Markets Association (trade association for broker dealers, investment banks and asset managers); Hightower Advisors (wealth management firm); Cohen & Steers, Inc. (global investment manager).

- \* Each Trustee oversees 124 portfolios of the fund complex, consisting of the series in the Trust (26 portfolios) and in The RBB Fund, Inc. (98 portfolios).
- (1) Subject to the Trust's Retirement Policy, each Trustee may continue to serve as a Trustee until the last day of the calendar year in which the applicable Trustee attains age 75 or until his or her successor is elected and qualified or his or her death, resignation or removal. The Board reserves the right to waive the requirements of the Policy with respect to an individual Trustee. The Board has approved waivers of the policy with respect to Messrs. Giordano, Reichman, and Sablowsky. Each officer holds office at the pleasure of the Board until the next special meeting of the Trust or until his or her successor is duly elected and qualified, or until he or she dies, resigns or is removed.
  - (2) Messrs. Sablowsky and Shea are considered "interested persons" of the Trust as that term is defined in the 1940 Act and are referred to as "Interested Trustees." Mr. Sablowsky is considered an "Interested Trustee" of the Trust by virtue of his position as a senior officer of Oppenheimer & Co., Inc., a registered broker-dealer. Mr. Shea is considered an "Interested Trustee" of the Trust by virtue of his position on the board of Barclays Bank plc, a multinational bank.
  - (3) A Disinterested Advisory Board Member is an Advisory Board Member that is not an "interested person" of the Trust within the meaning of Section 2(a)(19) of the 1940 Act.

#### **Trustee Experience, Qualifications, Attributes and/or Skills**

The information above includes each Trustee's principal occupations during the last five years. Each Trustee possesses extensive additional experience, skills and attributes relevant to his or her qualifications to serve as a Trustee. The cumulative background of each Trustee led to the conclusion that each Trustee should serve as a Trustee of the Trust. Mr. Chandler has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the investment technology consulting/services and investment banking/brokerage industries, and also serves on various boards. Ms. Dolly has over three decades of experience in the financial services industry, and she has demonstrated her leadership and management abilities by serving in numerous senior executive-level positions. Mr. Giordano has years of experience as a consultant to financial services organizations and also serves on the boards of other registered investment companies. Mr. Reichman brings decades of investment management experience to the Board, in addition to senior executive-level management experience. Mr. Sablowsky has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the financial services industry. Mr. Shea has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the brokerage, clearing, banking and investment services industry, including service on the boards of public companies, industry regulatory organizations and a university. Ms. Tirinnanzi has over 20 years of strategic, regulatory and operational management experience in the financial and mortgage industries, including service on the boards of a public company and real estate investment trust, and brings to the Board her expertise regarding derivatives markets and related businesses.

#### **Standing Committees**

The responsibilities of each Committee of the Board and its members are described below.

*Audit Committee.* The Board has an Audit Committee comprised of three Independent Trustees. The current members of the Audit Committee are Ms. Tirinnanzi and Messrs. Chandler and Giordano. The Audit Committee, among other things, reviews results of the annual audit and approves the firm(s) to serve as independent auditors. The Audit Committee convened five times during the fiscal year ended August 31, 2025.

*Contract Committee.* The Board has a Contract Committee comprised of an Interested Trustee and two Independent Trustees. The current members of the Contract Committee are Ms. Dolly and Tirinnanzi and Mr. Sablowsky. The Contract Committee reviews and makes recommendations to the Board regarding the approval and continuation of agreements and plans of the Trust. The Contract Committee convened four times during the fiscal year ended August 31, 2025.

*Executive Committee.* The Board has an Executive Committee comprised of an Interested Trustee and three Independent Trustees. The current members of the Executive Committee are Messrs. Chandler, Giordano, Reichman and Sablowsky. The Executive Committee may generally carry on and manage the business of the Trust when the Board is not in session. The Executive Committee convened one time during the fiscal year ended August 31, 2025.

*Nominating and Governance Committee.* The Board has a Nominating and Governance Committee comprised of three Independent Trustees. The current members of the Nominating and Governance Committee are Messrs. Chandler, Giordano and Reichman. The Nominating and Governance Committee recommends to the Board all persons to be nominated as Trustees of the Trust. The Nominating and Governance Committee will consider nominees recommended by shareholders. Recommendations should be submitted to the Committee care of the Trust's Secretary. The Nominating and Governance Committee convened four times during the fiscal year ended August 31, 2025.

*Product Development Committee.* The Board has a Product Development Committee comprised of the Interested Trustees and two Independent Trustees. The current members of the Product Development Committee are Messrs. Chandler, Reichman, Sablowsky and Shea. The Product Development Committee oversees the process regarding the addition of new investment advisers and investment products to the Trust. The Product Development Committee met five times during the fiscal year ended August 31, 2025.

*Regulatory Oversight Committee.* The Board has a Regulatory Oversight Committee comprised of the Interested Trustees and two Independent Trustees. The current members of the Regulatory Oversight Committee are Ms. Dolly and Messrs. Reichman, Sablowsky, and Shea. The Regulatory Oversight Committee monitors regulatory developments in the mutual fund industry and focuses on various regulatory aspects of the operation of the Trust. The Regulatory Oversight Committee met four times during the fiscal year ended August 31, 2025.

*Valuation Committee.* The Board has a Valuation Committee comprised of the Interested Trustees and two officers of the Trust. The members of the Valuation Committee are Messrs. Faia, Sablowsky, Shea and Shaw. The Valuation Committee is responsible for reviewing fair value determinations. The Valuation Committee met four times during the fiscal year ended August 31, 2025.

## **Risk Oversight**

The Board performs its risk oversight function for the Trust through a combination of (1) direct oversight by the Board as a whole and Board committees and (2) indirect oversight through the Trust's investment advisers and other service providers, Trust officers and the Trust's Chief Compliance Officer ("CCO"). The Trust is subject to a number of risks, including but not limited to investment risk, compliance risk, operational risk, reputational risk, credit risk and counterparty risk. Day-to-day risk management with respect to the Trust is the responsibility of the Trust's investment advisers or other service providers (depending on the nature of the risk) that carry out the Trust's investment management and business affairs. Each of the investment advisers and the other service providers have their own independent interest in risk management and their policies and methods of risk management will depend on their functions and business models and may differ from the Trust's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls.

The Board provides risk oversight by receiving and reviewing on a regular basis reports from the Trust's investment advisers or other service providers, receiving and approving compliance policies and procedures, periodic meetings with the Trust's portfolio managers to review investment policies, strategies and risks, and meeting regularly with the Trust's CCO to discuss compliance reports, findings and issues. The Board also relies on the Trust's investment advisers and other service providers, with respect to the day-to-day activities of the Trust, to create and maintain procedures and controls to minimize risk and the likelihood of adverse effects on the Trust's business and reputation.

Board oversight of risk management is also provided by various Board Committees. For example, the Audit Committee meets with the Trust's independent registered public accounting firms to ensure that the Trust's respective audit scopes include risk-based considerations as to the Trust's financial position and operations.

The Board may, at any time and in its discretion, change the manner in which it conducts risk oversight. The Board's oversight role does not make the Board a guarantor of the Trust's investments or activities.

### Trustee and Advisory Board Member Ownership of Shares of the Trust

The following table sets forth the dollar range of equity securities beneficially owned by each Trustee in the Funds and in all of the portfolios of the Trust and The RBB Fund, Inc. (together, the "Fund Complex") (which for each Trustee comprise all registered investment companies within the Trust's family of investment companies overseen by him or her), as of December 31, 2024, including the amounts through the deferred compensation plan.

	Dollar Range of Equity Securities in the Funds <sup>(1)</sup>	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee within the Family of Investment Companies
<b>INDEPENDENT TRUSTEES</b>		
Gregory P. Chandler	None	Over \$100,000
Lisa A. Dolly	None	None
Nicholas A. Giordano	None	\$50,001-\$100,000
Arnold M. Reichman	None	Over \$100,000
Martha A. Tirinnanzi	None	Over \$100,000
<b>INTERESTED TRUSTEES</b>		
Robert Sablowsky	None	Over \$100,000
Brian T. Shea	None	\$10,001-\$50,000
<b>ADVISORY BOARD MEMBERS</b>		
Eugene Podsiadlo <sup>(2)</sup>	None	\$10,001-\$50,000

(1) The Funds had not commenced operations prior to the date of this SAI.

(2) Mr. Podsiadlo is not a Trustee. He was appointed as an Advisory Board Member effective October 1, 2025.

### Trustees', Advisory Board Members' and Officers' Compensation

Effective January 1, 2026, the Trust and The RBB Fund, Inc., based on an allocation formula, will pay each Trustee and Advisory Board Member a retainer at the rate of \$265,000 annually, \$15,000 for each regular meeting of the Board attended in-person; \$6,000 for each Regulatory Oversight Committee meeting attended in-person; \$5,000 for each other committee (excluding the Regulatory Oversight Committee) meeting attended in-person; \$9,000 and \$6,500, respectively, for each special in-person or telephonic Board meeting that lasts longer than 30 minutes; \$4,000 for each special committee meeting that lasts longer than 30 minutes; \$3,000 for each special Board or committee meeting that lasts less than 30 minutes. The Chair of the Audit Committee and Chair of the Regulatory Oversight Committee will each receive an additional fee of \$50,000 for their services. The Chair of the Contract Committee and the Chair of the Nominating and Governance Committee will each receive an additional fee of \$40,000 per year for their services. The Vice Chair of the Regulatory Oversight Committee will receive an additional fee of \$25,000 for his services. The Chair of the Board will receive an additional fee of \$125,000 per year for his services in this capacity and the Vice Chair of the Board will receive an additional fee of \$50,000 per year for his services in this capacity.

From January 1, 2025, through December 31, 2025, the Trust and The RBB Fund, Inc., based on an allocation formula, pay each Trustee and Advisory Board Member a retainer at the rate of \$225,000 annually, \$15,000 for each regular meeting of the Board attended in-person; \$6,000 for each Regulatory Oversight Committee meeting attended in-person; \$5,000 for each other committee (excluding the Regulatory Oversight Committee) meeting attended in-person; \$9,000 and \$6,500, respectively, for each special in-person or telephonic Board meeting that lasts longer than 30 minutes; \$4,000 for each special committee meeting that lasts longer than 30 minutes; \$3,000 for each special Board or committee meeting that lasts less than 30 minutes. The Chair of the Audit Committee and Chair of the Regulatory Oversight Committee each receives an additional fee of \$50,000 for their services. The Chair of the Contract Committee and the Chair of the Nominating and Governance Committee each receives an additional fee of \$40,000 per year for their services. The Vice Chair of the Regulatory Oversight Committee receives an additional fee of \$25,000 for his services. The Chair of the Board receives an additional fee of \$125,000 per year for his services in this capacity and the Vice Chair of the Board receives an additional fee of \$50,000 per year for his services in this capacity.

From January 1, 2024 through December 31, 2024, the Fund Complex based on an allocation formula, paid each Trustee a retainer at the rate of \$175,000 annually, \$13,500 for each regular meeting of the Board attended in-person; \$5,000 for each Regulatory Oversight Committee meeting attended in-person; \$4,000 for each other committee (excluding the Regulatory Oversight Committee) meeting attended in-person; \$7,500 and \$5,000, respectively, for each special in-person or telephonic Board meeting that lasts longer than 30 minutes; \$3,000 for each special committee meeting that lasts longer than 30 minutes; \$2,000 for each special Board or committee meeting that lasts less than 30 minutes. The Chair of the Audit Committee and Chair of the Regulatory Oversight Committee each received an additional fee of \$35,000 for their services. The Chair of the Contract Committee and the Chair of the Nominating and Governance Committee each received an additional fee of \$25,000 per year for their services. The Vice Chair of the Regulatory Oversight Committee received an additional fee of \$15,000 for his services. The Chair of the Board received an additional fee of \$100,000 per year for his services in this capacity and the Vice Chair of the Board received an additional fee of \$40,000 per year for his services in this capacity.

Trustees are reimbursed for any reasonable out-of-pocket expenses incurred in attending meetings of the Board or any committee thereof. An employee of Vigilant Compliance, LLC serves as CCO of the Trust. Vigilant Compliance, LLC is compensated for the services provided to the Trust, and such compensation is determined by the Board. For the fiscal year ended August 31, 2025, Vigilant Compliance, LLC received \$1,060,000 in the aggregate from all series of the Fund Complex for its services. For the fiscal year ended August 31, 2025, Vigilant Compliance, LLC did not receive any fees from the Fund because the Fund had not commenced operations prior to the date of this SAI. Employees of the Trust serve as President, Chief Financial Officer, Chief Operating Officer, Secretary, Director of Marketing & Business Development, Assistant Treasurer, and Assistant Secretary, and are compensated for services provided. For the fiscal year ended August 31, 2025, each of the following members of the Board and the President, Chief Financial Officer, Chief Operating Officer, Secretary, Director of Marketing & Business Development, Assistant Treasurer, and Assistant Secretary received compensation from the Fund and the Fund Complex in the following amounts:

<b>Name of Trustee/Officer</b>	<b>Aggregate Compensation from the Fund<sup>(1)</sup></b>	<b>Pension or Retirement Benefits Accrued as Part of Funds Expenses</b>	<b>Total Compensation From Fund Complex Paid to Trustees or Officers</b>
<b>Independent Trustees:</b>			
Gregory P. Chandler, Trustee	None	N/A	\$406,250
Lisa A. Dolly, Trustee	None	N/A	\$363,750
Nicholas A. Giordano, Trustee	None	N/A	\$369,250
Arnold M. Reichman, Trustee and Chair	None	N/A	\$476,750
Robert A. Straniere, Trustee <sup>(2)</sup>	None	N/A	\$101,250
Martha A. Tirinnanzi, Trustee	None	N/A	\$336,000
<b>Interested Trustees:</b>			
Robert Sablowsky, Trustee and Vice Chair	None	N/A	\$466,750
Brian T. Shea, Trustee	None	N/A	\$380,500
<b>Disinterested Advisory Board Members:</b>			
Eugene Podsiadlo <sup>(3)</sup>	None	N/A	\$0
<b>Officers:</b>			
Steven Plump, President	None	N/A	\$424,750
James G. Shaw, Chief Financial Officer, Chief Operating Officer and Secretary	None	N/A	\$546,000
Craig Urciuoli, Director of Marketing & Business Development	None	N/A	\$434,750
Thomas M. Reynolds, Assistant Treasurer and Assistant Secretary	None	N/A	\$200,000

(1) The Fund had not commenced operations prior to the date of this SAI.

(2) Mr. Straniere retired from his role as a Trustee effective January 2025.

(3) Mr. Podsiadlo began serving as an Advisory Board Member effective October 1, 2025.

Each compensated Trustee is entitled to participate in the Trust's deferred compensation plan (the "DC Plan"). Under the DC Plan, a compensated Trustee may elect to defer all or a portion of his or her compensation and have the deferred compensation treated as if it had been invested by the Trust in shares of one or more of the portfolios of the Trust. The amount paid to the Trustees under the DC Plan will be determined based upon the performance of such investments.

As of December 31, 2024, the Independent Trustees and their respective immediate family members (spouse or dependent children) did not own beneficially or of record any securities of the Trust's investment advisers or distributor, or of any person directly or indirectly controlling, controlled by, or under common control with the investment advisers or distributor.

### Trustee Emeritus Program

The Board has created a position of Trustee Emeritus, whereby an incumbent Trustee who has attained at least the age of 75 and completed a minimum of fifteen years of service as a Trustee or as a director of The RBB Fund, Inc., may, in the sole discretion of the Nominating and Governance Committee of the Trust ("Committee"), be recommended to the full Board to serve as Trustee Emeritus.

A Trustee Emeritus that has been approved as such receives an annual fee in an amount equal to up to 50% of the annual base compensation paid to a Trustee. Effective January 1, 2026, a Trustee Emeritus can receive an annual fee in an amount up to 50% of the annual base compensation paid to a Trustee in effect at the time such Trustee Emeritus was first appointed Trustee Emeritus. Compensation will be determined annually by the Committee and the Board with respect to each Trustee Emeritus. In addition, a Trustee Emeritus will be reimbursed for certain expenses incurred in connection with their service, including expenses of travel and lodging incurred in attendance at Board/Committee meetings. A Trustee Emeritus will continue to receive relevant materials concerning the Fund and will be available to consult with the Trustees at reasonable times as requested. However, a Trustee Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Funds.

A Trustee Emeritus will be permitted to serve in such capacity from year to year at the pleasure of the Committee and the Board for up to three years. Effective February 2024, Julian Brodsky serves as a Trustee Emeritus of the Trust. Effective January 2025, Robert Straniere serves as a Trustee Emeritus of the Trust.

For the fiscal year ended August 31, 2025, Julian Brodsky and Robert Straniere received compensation for their roles as a Trustee Emeritus in the following amounts:

Trustee Emeritus	Aggregate Compensation from the Funds <sup>(1)</sup>	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Fund Complex
Julian Brodsky	\$0	N/A	N/A	\$106,250
Robert Straniere	\$0	N/A	N/A	\$84,375

(1) The Funds had not commenced operations prior to the date of this SAI.

### CODE OF ETHICS

The Trust, Adviser and the Sub-Adviser have each adopted a code of ethics ("Code of Ethics") pursuant to Rule 17j-1 under the 1940 Act, which governs personal securities trading by their respective personnel. Each Code of Ethics permits such individuals to purchase and sell securities, including securities that are purchased, sold, or held by the Funds, but only subject to certain conditions designed to ensure that purchases and sales by such individuals do not adversely affect each Fund's investment activities.

### PRINCIPAL HOLDERS

Any person owning, directly or indirectly, more than 25% of the outstanding shares of a Fund is presumed to control the Fund. Principal holders are persons who own 5% or more of the outstanding shares of a Fund. No principal shareholder information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Because the Funds had not commenced operations prior to the date of this SAI, the Trustees and officers of the Trust as a group owned none of the outstanding Shares of each of the Funds.

## INVESTMENT ADVISORY AND SUB-ADVISORY AGREEMENTS

### Investment Advisory Agreement

Twin Oak ETF Company acts as investment adviser to the Funds. The Adviser is a Delaware company and is located at 888 Worchester Street, Suite 200, Wellesley, Massachusetts 02482. The Adviser is registered with the SEC as an investment adviser.

The Adviser provides investment advisory services to the Funds pursuant to the terms of an Investment Advisory Agreement (the “Advisory Agreement”) between the Trust and the Adviser. After the initial two year-term, the Advisory Agreement may be continued in effect from year to year with the approval of (1) the Board or (2) vote of a majority (as defined by the 1940 Act) of the outstanding voting securities of the Fund, provided that in either event the continuance must also be approved by a majority of the Independent Trustees by vote cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement terminates automatically in the event of its assignment, as defined in the 1940 Act and the rules thereunder.

Subject to the supervision of the Board, the Adviser will provide for the overall management of the Funds including (i) the provision of a continuous investment program for the Funds, including investment research and management with respect to all securities, investments, cash and cash equivalents, (ii) the determination from time to time of the securities and other investments to be purchased, retained, or sold by the Funds, and (iii) the placement from time to time of orders for all purchases and sales of securities and other investments made for the Funds. The Adviser will provide the services rendered by it in accordance with each Fund’s investment objective, restrictions and policies as stated in the Prospectus and in this SAI. The Adviser will not be liable for any error of judgment, mistake of law, or for any loss suffered by the Funds in connection with the performance of the Advisory Agreement, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services or a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties, or from reckless disregard of its obligations and duties under the Advisory Agreement.

Pursuant to the terms of the Advisory Agreement, in consideration of the services provided by the Adviser, each Fund will pay the Adviser and the Adviser will accept as full compensation a fee, computed daily and payable monthly, at the annual rate shown below:

<b>Fund</b>	<b>Advisory Fee</b>
Twin Oak Enhanced Equity ETF	0.99%
Twin Oak Enhanced Fixed Income ETF	0.45%
Twin Oak Global Equity ETF	0.75%
Twin Oak Strategic Solutions ETF	0.75%
Twin Oak Hedged Opportunities ETF	0.99%

For any period less than a full month during which this Agreement is in effect, the fee shall be prorated according to the proportion which such period bears to a full month. During the term of the Advisory Agreement, the Adviser will pay all expenses incurred by it in connection with its activities under the Agreement. In addition, for no additional compensation, the Adviser will pay all of the other operating expenses of the Fund, excluding (i) its advisory fees payable under the Advisory Agreement, (ii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; (iii) interest expenses; (iv) brokerage expenses, trading expenses and other expenses (such as stamp taxes) in connection with the execution of portfolio transactions or in connection with creation and redemption transactions; (v) tax expenses (including any income or franchise taxes) and governmental fees; and (vi) extraordinary expenses, such as litigation costs and other expenses not incurred in the ordinary course of business. The Adviser will not be liable for any error of judgment, mistake of law, or for any loss suffered by the Fund in connection with the performance of the Advisory Agreement, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services or a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties, or from reckless disregard of its obligations and duties under the Advisory Agreement.

The Trust and the Adviser have entered into an expense limitation agreements under which the Adviser has agreed to waive management fees and/or pay Fund expenses to the extent necessary so that a Fund's total annual operating expenses (excluding Acquired Fund Fees and Expenses, taxes, interest, brokerage fees, 12b-1 fees (if any), certain insurance costs, and extraordinary an other non-routine expenses) through the period ending December 31, 2026 do not exceed 0.20% of Shares for the Twin Oak Enhanced Fixed Income ETF, 0.35% of Shares for the Twin Oak Strategic Solutions ETF and 0.49% for the Twin Oak Hedged Opportunities ETF. The expense limitation agreements may be terminated by the Board of Trustees of the Trust (the “Board” or “Trustees”) at any time and also will terminate automatically upon the expiration or termination of the Fund's advisory contract with the Adviser.

No information about advisory fees paid by the Funds to the Adviser is provided because the Funds have not commenced operations prior to the date of this SAI.

### Investment Sub-Advisory Agreement

Exchange Traded Concepts, LLC, an Oklahoma limited liability company located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, serves as the investment sub-adviser to each Fund. The Sub-Adviser is an SEC-registered investment adviser formed in 2009 and is majority owned by Cottonwood ETF Holdings LLC.

The Sub-Adviser provides trading and execution services to the Funds pursuant to the terms of a Sub-Advisory Agreement (the “Sub-Advisory Agreement”) among the Trust, the Adviser and the Sub-Adviser. After the initial two year-term, the Sub-Advisory Agreement may be continued in effect from year to year with the (1) approval of the Board, or (2) vote of a majority (as defined by the 1940 Act) of the outstanding voting securities of each Fund, provided that in either event the continuance must also be approved by a majority of the Independent Trustees by vote cast in person at a meeting called for the purpose of voting on such approval. The Sub-Advisory Agreement terminates automatically in the event of its assignment, as defined in the 1940 Act and the rules thereunder. For its services, the Sub-Adviser is entitled to a fee from the Adviser.

The Sub-Advisory Agreement provides that the Sub-Adviser shall not be protected against any liability to the Trust or its shareholders by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of its respective duties. The Adviser and the Sub-Adviser each agree to indemnify the other against any claim against, loss or liability to such other party (including reasonable attorneys’ fees) arising out of any action on the part of the indemnifying party which constitutes willful misfeasance, bad faith, or gross negligence in the performance of duties under the Sub-Advisory Agreement, or reckless disregard of the obligations and duties under the Sub-Advisory Agreement.

### PORTFOLIO MANAGERS

This section includes information about the Fund’s portfolio managers, including information about other accounts they manage, the dollar range of Fund shares they own and how they are compensated.

The Adviser

*Description of Compensation.* Each portfolio manager receives a fixed salary and potential discretionary bonus compensation. Mr. Wainwright, who is an owner of the Adviser through holding companies, may receive additional compensation based on the profitability of the overall business.

**Other Accounts.** In addition to the Fund, the portfolio managers are jointly responsible for the day-to-day management of certain other accounts, as listed below. The information below is provided as of September 30, 2025.

Portfolio Managers;	Total Accounts		Accounts With Performance-Based Fees	
	Number	Assets	Number	Assets
Zachary Wainwright				
Registered Investment Companies	3	\$404.6M	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0
Greg Stoner				
Registered Investment Companies	2	\$285.4M	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0

**Conflicts of Interest.** Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other accounts. More specifically, a portfolio manager who manages multiple funds is presented with the following potential conflicts:

The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. The management of multiple funds and accounts also may give rise to potential conflicts of interest if the funds and accounts have different objectives, benchmarks, time horizons, and fees as the portfolio manager must allocate his time and investment ideas across multiple funds and accounts.

- With respect to securities transactions for the Funds, the Adviser determines which broker to use to execute each order, consistent with the duty to seek best execution of the transaction. A portfolio manager may execute transactions for another fund or account that may adversely impact the value of securities held by the Funds. Securities selected for funds or accounts other than a Fund may outperform the securities selected for the Fund.
- The appearance of a conflict of interest may arise where the Adviser has an incentive, such as a performance-based management fee. The management of personal accounts may give rise to potential conflicts of interest; there is no assurance that the Funds' code of ethics will adequately address such conflicts. One of a portfolio manager's numerous responsibilities may be to assist in the sale of Fund shares. Because a portfolio manager's compensation is indirectly linked to the sale of Fund shares, he may have an incentive to devote time to marketing efforts designed to increase sales of Fund shares.
- The Funds have adopted a code of ethics that, among other things, permits personal trading by employees under conditions where it has been determined that such trades would not adversely impact client accounts. Nevertheless, the management of personal accounts may give rise to potential conflicts of interest, and there is no assurance that these codes of ethics will adequately address such conflicts.

The Adviser and the Funds have adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

**Securities Ownership.** The portfolio managers did not own any shares of the Funds as no shares of the Funds were outstanding prior to the date of this SAI.

## UNDERWRITER

The Trust has entered into a distribution agreement (the "Distribution Agreement") with Quasar Distributors, LLC (the "Distributor"), Three Canal Plaza, Suite 100, Portland, Maine 04101, pursuant to which the Distributor acts as each Fund's principal underwriter with respect to the creation and redemption of Creation Units of the Funds. Shares are continuously offered for sale by the Distributor only in Creation Units. The Distributor will not distribute Shares in amounts less than a Creation Unit.

Under the Distribution Agreement, the Distributor will review all orders for the purchase and redemption of Creation Units by authorized participants who have executed an Authorized Participant Agreement with the Distributor and transfer agent/index receipt agent. The Distributor will also make available copies of the Prospectus to purchasers of Creation Units and, upon request, the SAI and will maintain records of orders placed with it. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934, as amended (the "Exchange Act") and a member of the Financial Industry Regulatory Authority ("FINRA").

The Distributor may also enter into agreements with securities dealers ("Soliciting Dealers") who will solicit purchases of Creation Units of shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in "Procedures for Creation of Creation Units" below) or DTC Participants.

The Distribution Agreement has an initial term of up to two years and will continue in effect thereafter only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust, on behalf of the Fund, on 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Independent Trustees of the Trust, or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

## **DISTRIBUTION AND SERVICE PLAN**

As stated in the Funds' Prospectus, the Trust has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 with respect to shares of the Funds. However, no 12b-1 fee is currently charged to the Funds, and there are no plans in place to impose a Rule 12b-1 fee at this time. Pursuant to the Plan, the Funds may enter into agreements from time to time with financial intermediaries providing for support and/or distribution services to customers of the financial intermediaries who are the beneficial owners of Fund shares. Under the agreements, the Funds may pay financial intermediaries up to 0.25% (on an annualized basis) of the average daily NAV of the shares beneficially owned by their customers. Distribution services may include: (i) services in connection with distribution assistance; or (ii) payments to financial institutions and other financial intermediaries, such as broker-dealers and mutual fund "supermarkets," as compensation for services or reimbursement of expenses incurred in connection with distribution assistance.

Any amendment to increase materially the costs under the Plan with respect to a Fund must be approved by the holders of a majority of the outstanding shares of the Fund. So long as the Plan is in effect, the selection and nomination of the members of the Board who are not "interested persons" (as defined in the 1940 Act) of the Trust will be committed to the discretion of such Non-Interested Trustees.

## **PURCHASE AND REDEMPTION OF CREATION UNITS**

### **Purchase and Issuance of Creation Units**

The Trust issues and sells shares of the Funds only: (i) in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees), at their NAV next determined after receipt of an order, on any Business Day, in proper form pursuant to the terms of the Authorized Participant Agreement ("Participant Agreement"); or (ii) pursuant to the Dividend Reinvestment Service (defined below). The NAV of each Fund's shares is calculated each business day as of the close of regular trading on the Exchange, generally 4:00 p.m., Eastern Time. The Funds will not issue fractional Creation Units. A Business Day is any day on which the Exchange is open for business.

**FUND DEPOSIT.** The consideration for purchase of a Creation Unit of a Fund generally consists of the in-kind deposit of a designated portfolio of securities (the "Deposit Securities") per each Creation Unit, plus the Cash Component (defined below), computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a "cash in lieu" amount ("Deposit Cash") to be added to the Cash Component to replace any Deposit Security. When accepting purchases of Creation Units for all or a portion of Deposit Cash, a Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser. These additional costs associated with the acquisition of Deposit Securities ("Non-Standard Charges") may be recoverable from the purchaser of creation units.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the "Fund Deposit," which represents the minimum initial and subsequent investment amount for a Creation Unit of a Fund. The "Cash Component" is an amount equal to the difference between the NAV of the Fund's shares (per Creation Unit) and the market value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (i.e., the NAV per Creation Unit exceeds the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component will be such positive amount. If the Cash Component is a negative number (i.e., the NAV per Creation Unit is less than the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which will be the sole responsibility of the Authorized Participant (as defined below).

Each Fund, through the National Securities Clearing Corporation ("NSCC"), makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is subject to any applicable adjustments as described below, in order to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for a Fund Deposit for a Fund changes from time to time as rebalancing adjustments and corporate action events are reflected by the Sub-Adviser. The composition of the Deposit Securities will change in response to adjustments to the weighting or composition of the securities constituting the Fund's portfolio.

The Trust reserves the right to permit or require the substitution of an amount of cash (i.e., a “cash in lieu” amount) to replace any Deposit Security, which will be added to the Deposit Cash, if applicable, and the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, “custom orders”).

**CASH PURCHASE METHOD.** The Trust may at its discretion permit full or partial cash purchases of Creation Units of the Funds. When full or partial cash purchases of Creation Units are available or specified for the Funds, they will be effected in essentially the same manner as in-kind purchases thereof. In the case of a full or partial cash purchase, the Authorized Participant must pay the cash equivalent of the Deposit Securities it would otherwise be required to provide through an in-kind purchase, plus the same Cash Component required to be paid by an in-kind purchaser together with a Creation Transaction Fee and Non-Standard Charges, as may be applicable.

**PROCEDURES FOR PURCHASE OF CREATION UNITS.** To be eligible to place orders with the Distributor to purchase a Creation Unit of a Fund, an entity must be (i) a “Participating Party”, i.e., a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant. In addition, each Participating Party or DTC Participant (each, an “Authorized Participant” or “AP”) must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Transfer Agent” or “Fund Services”) and the Trust, with respect to purchases and redemptions of Creation Units. Each AP will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust an amount of cash sufficient to pay the Cash Component together with the Creation Transaction Fee (defined below) and any other applicable fees and taxes. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Trust in connection with the purchase of a Creation Unit, which the Transaction Fee is designed to cover.

All orders to purchase shares directly from a Fund must be placed for one or more Creation Units in the manner set forth in the Participant Agreement (the “Cut-Off Time”). The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the “Order Placement Date.”

An AP may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase shares directly from a Fund in Creation Units have to be placed by the investor’s broker through an AP that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such APs may have international capabilities.

On days when the Exchange closes earlier than normal, a Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which a Fund’s investments are primarily traded is closed on any day, a Fund will not accept orders on such day. Orders must be transmitted by an AP by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement and in accordance with the AP Handbook. With respect to a Fund, the Distributor will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an AP should allow sufficient time to permit proper submission of the purchase order to the Distributor by the Cut-Off Time on the Business Day on which the order is placed. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an AP.

Fund Deposits must be delivered by an AP through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a subcustody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian will cause the subcustodian of such Fund to maintain an account into which the AP will deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local subcustodian. The Fund Deposit transfer must be ordered by the AP in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of a Fund or its agents by no later than the settlement date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination will be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by the Custodian no later than the settlement date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received in a timely manner by the settlement date, the creation order may be cancelled. Upon written notice to the Distributor, such canceled order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the then current NAV of the Fund.

The order will be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the Cut-Off Time and the federal funds in the appropriate amount are deposited by 2:00 p.m., Eastern time, with the Custodian on the settlement date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received by 2:00 p.m., Eastern time on the settlement date, then the order may be deemed to be rejected and the AP will be liable to the Fund for losses, if any, resulting therefrom. A creation request is considered to be in “proper form” if all procedures set forth in the Participant Agreement, AP Handbook and this SAI are properly followed.

**ISSUANCE OF A CREATION UNIT.** Except as provided herein, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the subcustodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant subcustodian or subcustodians, the Distributor and the Adviser will be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Distributor. However, each Fund reserves the right to settle Creation Unit transactions on a basis other than the third Business Day following the day on which the purchase order is deemed received by the Distributor in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances. The AP will be liable to a Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the market value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the “Additional Cash Deposit”), which will be maintained in a separate non-interest bearing collateral account. An additional amount of cash will be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily marked to market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. APs will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a Transaction Fee as set forth below under “Creation Transaction Fee” will be charged in all cases, unless otherwise advised by the Funds, and Non-Standard Charges may also apply. The delivery of Creation Units so created generally will occur no later than the settlement date.

**ACCEPTANCE OF ORDERS OF CREATION UNITS.** The Trust reserves the right to reject an order for Creation Units transmitted to it by the Distributor in respect of a Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (d) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; or (e) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful.

**CREATION TRANSACTION FEE.** A purchase (i.e., creation) transaction fee is imposed for the transfer and other transaction costs associated with the purchase of Creation Units, and investors will be required to pay a Creation Transaction Fee regardless of the number of Creation Units created in the transaction. A Fund may adjust the creation transaction fee from time to time based upon actual experience. In addition, a Fund may impose a Non-Standard Charge of up to 2% of the value of the creation transactions for cash creations, non-standard orders, or partial cash purchases for the Fund. A Fund may adjust the Non-Standard Charge from time to time based upon actual experience. Investors who use the services of an AP, broker or other such intermediary may be charged a fee for such services, which may include an amount for the Creation Transaction Fee and Non-Standard Charges. Investors are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Trust. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Trust in connection with the purchase of a Creation Unit, which the Transaction Fee is designed to cover. The standard Creation Transaction Fee for each Fund is \$300.

**RISKS OF PURCHASING CREATION UNITS.** There are certain legal risks unique to investors purchasing Creation Units directly from a Fund. Because each Fund's shares may be issued on an ongoing basis, a "distribution" of shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from a Fund, breaks them down into the constituent shares, and sells those shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary-market demand for shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause a shareholder to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with each Fund's shares as part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3)(C) of the Securities Act.

### **Redemption of Creation Units**

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by a Fund through the Transfer Agent and only on a Business Day. **EXCEPT UPON LIQUIDATION OF A FUND, THE TRUST WILL NOT REDEEM SHARES IN AMOUNTS LESS THAN CREATION UNITS.** Investors must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

With respect to each Fund, the Custodian, through the NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time) on each Business Day, the list of the names and share quantities of the Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of a Fund, redemption proceeds for a Creation Unit will consist of Fund Securities -- as announced by the Custodian on the Business Day of the request for redemption received in proper form -- plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the "Cash Redemption Amount"), less any fixed redemption transaction fee as set forth below and any Non-Standard Charges. If the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the differential is required to be made by or through an AP by the redeeming shareholder. Notwithstanding the foregoing, at the Trust's discretion, an AP may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

**CASH REDEMPTION METHOD.** Although the Trust does not ordinarily permit full or partial cash redemptions of Creation Units of the Funds, when full or partial cash redemptions of Creation Units are available or specified for a Fund, they will be effected in essentially the same manner as in-kind redemptions thereof. In the case of full or partial cash redemptions, the AP will receive the cash equivalent of the Fund Securities it would otherwise receive through an in-kind redemption, plus the same Cash Amount to be paid to an in-kind redeemer. A Fund may incur costs such as brokerage costs or taxable gains or losses that the Fund might not have incurred if the redemption had been made in-kind. These costs may decrease the Fund's NAV to the extent that the costs are not offset by a transaction fee payable by an AP. Shareholders may be subject to tax on gains they would not otherwise have been subject to and/or at an earlier date than if the Fund had effected redemptions wholly on an in-kind basis.

**REDEMPTION TRANSACTION FEES.** A redemption transaction fee may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units, and APs will be required to pay a Redemption Transaction Fee regardless of the number of Creation Units created in the transaction. The redemption transaction fee is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. A Fund may adjust the redemption transaction fee from time to time based upon actual experience. In addition, a Fund may impose a Non-Standard Charge of up to 2% of the value of a redemption transaction for cash redemptions, non-standard orders, or partial cash redemptions for the Fund. Investors who use the services of an AP, broker or other such intermediary may be charged a fee for such services which may include an amount for the Redemption Transaction Fees and Non-Standard Charges. Investors are responsible for the costs of transferring the securities constituting the Fund Securities to the account of the Trust. The Non-Standard Charges are payable to each Fund as it incurs costs in connection with the redemption of Creation Units, the receipt of Fund Securities and the Cash Redemption Amount and other transactions costs. The standard Redemption Transaction Fee for each Fund is \$300.

**PROCEDURES FOR REDEMPTION OF CREATION UNITS.** Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to the time as set forth in the Participant Agreement. A redemption request is considered to be in "proper form" if (i) an AP has transferred or caused to be transferred to the Trust's Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the AP on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor's shares through DTC's facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request will be rejected.

The AP must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor's broker through an AP which has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such AP. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an AP and transfer of the shares to the Trust's Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not APs.

In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or AP acting on behalf of such Shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three business days of the trade date.

**ADDITIONAL REDEMPTION PROCEDURES.** In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, the AP must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three Business Days of the trade date. However, due to the schedule of holidays in certain countries, the different treatment among foreign and U.S. markets of dividend record dates and dividend ex-dates (that is the last date the holder of a security can sell the security and still receive dividends payable on the security sold), and in certain other circumstances, the delivery of in-kind redemption proceeds may take longer than three Business Days after the day on which the redemption request is received in proper form. If neither the redeeming Shareholder nor the AP acting on behalf of such redeeming Shareholder has appropriate arrangements to take delivery of the Fund Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Fund Securities in such jurisdiction, the Trust may, in its discretion, exercise its option to redeem such shares in cash, and the redeeming shareholder will be required to receive its redemption proceeds in cash.

If it is not possible to make other such arrangements, or it is not possible to effect deliveries of the Fund Securities, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that each Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the relevant Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). The Funds may also, in their sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An AP or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The AP may request the redeeming investor of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an AP that is not a "qualified institutional buyer," ("QIB") as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An AP may be required by the Trust to provide a written confirmation with respect to QIB status in order to receive Fund Securities.

Because the portfolio securities of the Funds may trade on the relevant exchange(s) on days that the Exchange is closed or are otherwise not Business Days for such Fund, shareholders may not be able to redeem their shares of a Fund, or to purchase or sell shares of such Fund on the Exchange, on days when the NAV of such Fund could be significantly affecting by events in the relevant foreign markets.

The right of redemption may be suspended or the date of payment postponed with respect to each Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund or determination of the NAV of the shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

## **PORTFOLIO HOLDINGS INFORMATION**

Each Fund discloses its full portfolio holdings, as of the close of business the prior day, each day before the opening of trading on the Exchange at <https://twinoakets.com>.

## DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the sections in the Funds' Prospectus titled "HOW TO BUY AND SELL SHARES."

NAV is determined as of the close of regular trading on the NYSE (generally 4:00 p.m. Eastern time) each day the NYSE is open, except that no computation need be made on a day on which no orders to purchase or redeem shares have been received. The NYSE currently observes the following holidays: New Year's Day, Martin Luther King Jr. Day (third Monday in January), Presidents Day (third Monday in February), Good Friday (Friday before Easter), Memorial Day (last Monday in May), Juneteenth National Independence Day, Independence Day, Labor Day (first Monday in September), Thanksgiving Day (fourth Thursday in November), and Christmas Day.

NAV per share is computed by dividing the value of a Fund's net assets (*i.e.*, the value of its assets less its liabilities) by the total number of the Fund's shares outstanding. In computing NAV, securities are valued at market value as of the close of trading on each business day when the NYSE is open. Securities, other than stock options, listed on the NYSE or other exchanges are valued on the basis of the last reported sale price on the exchange on which they are primarily traded. However, if the last sale price on the NYSE is different from the last sale price on any other exchange, the NYSE price will be used. If there are no sales on that day, then the securities are valued at the bid price on the NYSE or other primary exchange for that day. Securities traded in the over-the-counter ("OTC") market are valued on the basis of the last sales price as reported by the National Association of Securities Dealers Automated Quotations ("NASDAQ"). If there are no sales on that day, then the securities are valued at the mean between the closing bid and asked prices as reported by NASDAQ. Stock options and stock index options traded on national securities exchanges or on NASDAQ are valued at the mean between the latest bid and asked prices for such options. Securities for which market quotations are not readily available and other assets are valued at fair value by the Adviser, as the Fund's valuation designee, as determined pursuant to procedures adopted in good faith by the Board. Debt securities that mature in less than 60 days are valued at amortized cost (unless the Board determines that this method does not represent fair value), if their original maturity was 60 days or less or by amortizing the value as of the 61st day before maturity, if their original term to maturity exceeded 60 days. A pricing service may be used to determine the fair value of securities held by the Fund. Any such service might value the investments based on methods that include consideration of yields or prices of securities of comparable quality, coupon, maturity, and type; indications as to values from dealers; and general market conditions. The service may also employ electronic data-processing techniques, a matrix system, or both to determine valuation. The Board will review and monitor the methods such services use to assure itself that securities are valued at their fair values.

The values of securities held by a Fund and other assets used in computing NAV are determined as of the time at which trading in such securities is completed each day. That time, in the case of foreign securities, generally occurs at various times before the close of the NYSE. Trading in securities listed on foreign securities exchanges will be valued at the last sale or, if no sales are reported, at the bid price as of the close of the exchange, subject to possible adjustment as described in the Prospectus. Foreign currency exchange rates are also generally determined before the close of the NYSE. On occasion, the values of such securities and exchange rates may be affected by events occurring between the time as of which determinations of such values or exchange rates are made and the close of the NYSE. When such events materially affect the value of securities held by the Fund or its liabilities, such securities and liabilities will be valued at fair value in accordance with procedures adopted in good faith by the Board. The values of any assets and liabilities initially expressed in foreign currencies will be converted to U.S. dollars based on exchange rates supplied by a quotation service.

## DIVIDENDS, DISTRIBUTIONS, AND TAXES

The following information supplements and should be read in conjunction with the section in the Funds' Prospectus titled "DIVIDENDS, DISTRIBUTIONS, AND TAXES." In addition, the following is only a summary of certain U.S. federal income tax considerations that generally affect each Fund and its shareholders. No attempt is made to present a comprehensive explanation of the tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning. Shareholders are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

It is the policy of the Trust each fiscal year to distribute substantially all of the Funds' net investment income (*i.e.*, generally, the income that it earns from dividends and interest on its investments, and any short-term capital gains, net of Fund expenses) and net capital gains (*i.e.*, the excess of the Fund's net long-term capital gains over its net short-term capital losses), if any, to its shareholders.

### **Dividend Reinvestment Service**

The Funds will not make the DTC book-entry dividend reinvestment service available for use by beneficial owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares issued by the Fund at NAV. Distributions reinvested in additional Shares of the Fund will nevertheless be taxable to beneficial owners acquiring such additional shares to the same extent as if such distributions had been received in cash.

### **Taxes – General**

The discussions of the federal tax consequences in the Prospectus and this SAI are based on the Code, the regulations issued under it, and court decisions and administrative interpretations, each as in effect on the date of the Prospectus and this SAI, respectively. Future legislative or administrative changes or court decisions may significantly alter the statements included therein and herein, and any such changes or decisions may be retroactive. Each Fund intends to elect to be, and intends to qualify each year for treatment as, a regulated investment company under Subchapter M of Subtitle A, Chapter 1, of the Code. As such, each Fund generally will be exempt from federal income tax on its net investment income and realized capital gains that it distributes to shareholders. To qualify for treatment as a regulated investment company, each Fund must meet three important tests each year.

First, each Fund must derive with respect to each taxable year at least 90% of its gross income from dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, other income derived with respect to its business of investing in such stock, securities, or currencies, or net income derived from interests in qualified publicly traded partnerships.

Second, generally, at the close of each quarter of its taxable year, at least 50% of the value of each Fund's assets must consist of cash and cash items, U.S. government securities, securities of other regulated investment companies, and securities of other issuers (as to which the Fund has not invested more than 5% of the value of its total assets in securities of such issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of such issuer), and no more than 25% of the value of each Fund's total assets may be invested in the securities (other than U.S. government securities and securities of other regulated investment companies) of (1) any one issuer, (2) two or more issuers that the Fund controls and that are engaged in the same or similar trades or businesses or related trades or businesses, or (3) one or more qualified publicly traded partnerships.

Third, each Fund must distribute an amount equal to at least the sum of 90% of its investment company taxable income (*i.e.* net investment income and the excess of net short-term capital gain over net long-term capital loss) before taking into account any deduction for dividends paid, and 90% of its tax-exempt income, if any, for the year.

Each Fund intends to comply with these requirements. If a Fund were to fail to make sufficient distributions, it could be liable for corporate income tax (which may include interest or penalties) and for excise tax (as discussed below) in respect of the shortfall or, if the shortfall is large enough and the Fund does not satisfy the 90% distribution requirement described above, the Fund could be disqualified as a regulated investment company. If for any taxable year a Fund were not to qualify as a regulated investment company, all its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders. In that event, taxable shareholders would recognize dividend income on distributions (including distributions of capital gains) to the extent of the Fund's current and accumulated earnings and profits, and corporate shareholders could be eligible for the dividends-received deduction.

The Code imposes a nondeductible 4% excise tax on regulated investment companies that fail to distribute each year an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). Each Fund intends to make sufficient distributions or deemed distributions each year to avoid liability for this excise tax.

A Fund may elect to retain its net capital gain or a portion thereof for investment and be taxed at corporate rates on the amount retained. In such case, the Fund may designate the retained amount as undistributed capital gains in a written notice to its shareholders, who will be treated as if each received a distribution of its pro rata share of such gain, with the result that each shareholder will (i) be required to report its pro rata share of such gain on its tax return as long-term capital gain, (ii) receive a refundable tax credit for its pro rata share of tax paid by the Fund on the gain and (iii) increase the tax basis for its shares by an amount equal to the deemed distribution less the tax credit.

Certain of a Fund's hedging and derivatives transactions are subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower-taxed long-term capital gain into higher-taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the intended characterization of certain complex financial transactions and (vii) produce income that will not be treated as qualifying income for purposes of the 90% gross income test described above. These rules could therefore affect the character, amount and timing of distributions to shareholders and the Fund's status as a regulated investment company. The Fund will monitor its transactions and may make certain tax elections in order to mitigate the effect of these provisions.

A Fund's investment in non-U.S. securities may be subject to non-U.S. withholding taxes. In that case, the Fund's yield on those securities would be decreased. Shareholders will generally not be entitled to claim a credit or deduction with respect to any non-U.S. taxes paid by the Fund.

### **Loss Carryforwards**

For federal income tax purposes, each Fund is generally permitted to carry forward a net capital loss in any year to offset its own capital gains, if any, during subsequent years.

### **Exchange of Stocks and Securities for Shares**

Certain initial investors in a Fund may be permitted to contribute a diversified portfolio of stocks and securities to the Fund in exchange for shares of the Fund, in a transaction that is expected to qualify as a tax-deferred contribution under Section 351 of the Code. If the foregoing transaction does not meet the requirements of Section 351 of the Code, contributing shareholders would recognize gain or loss based on the difference between the value of the Fund shares that they receive and their basis in the stocks and securities that they exchange for Fund shares. Assets received by a Fund in a tax-deferred contribution under Section 351 may have a lower basis than if the Fund acquired such assets for cash, which could increase future gain of the Fund on a taxable disposition of such assets.

### **State and Local Taxes**

Although each Fund intends to qualify as a regulated investment company and to be relieved of all or substantially all federal income taxes, depending upon the extent of its activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located or in which it is otherwise deemed to be conducting business, a Fund may be subject to the tax laws of such states or localities.

## **PORTFOLIO TRANSACTIONS AND BROKERAGE**

Subject to the general supervision of the Board, the Adviser is responsible for decisions to buy and sell securities for the Fund, the selection of brokers and dealers to effect the transactions, and the negotiation of brokerage commissions, if any. The Adviser has engaged the Sub-Adviser to perform certain responsibilities with respect to portfolio transactions and brokerage, as described below. On a daily basis, the Sub-Adviser may trade portfolio securities on behalf of a Fund, and may select broker-dealers to execute purchase and sale transactions. Purchases and sales of securities on a stock exchange are effected through brokers who charge a commission for their services. In the OTC market, securities are generally traded on a "net" basis, with dealers acting as principal for their own accounts without a stated commission, although the price of the security usually includes a profit to the dealer. In underwritten offerings, securities are purchased at a fixed price, which includes an amount of compensation to the underwriter, generally referred to as the underwriter's concession or discount. Certain money market instruments may be purchased directly from an issuer, in which case no commission or discounts are paid.

In addition, the Sub-Adviser may place a combined order for two or more accounts they manage, including each of the Funds, engaged in the purchase or sale of the same security if, in its judgment, joint execution is in the best interest of each participant and will result in best price and execution. Transactions involving commingled orders are allocated by the Sub-Adviser in a manner that it deems equitable to, and consistent with its fiduciary obligations to, each participant under the circumstances. In making such allocations, the main factors considered are the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment, the size of investment commitments generally held, and the opinions of the persons responsible for managing the Funds and the other client accounts. This procedure may, under certain circumstances, have an adverse effect on a Fund because the joint execution of orders could adversely affect the price or volume of the security that a Fund may obtain. The policy of a Fund regarding purchases and sales of securities is that primary consideration will be given to obtaining the most favorable executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Fund's policy is to pay commissions that are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Adviser and the Sub-Adviser believe that a requirement always to seek the lowest commission cost could impede effective management and preclude the Adviser and the Sub-Adviser from obtaining high-quality brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Adviser and Sub-Adviser rely on their experience and knowledge regarding commissions generally charged by various brokers and on their judgment in evaluating the brokerage and research services received from the broker effecting the transaction.

In seeking to implement the Funds' policies, the Sub-Adviser conducts trades on behalf of the Funds and effects transactions with brokers and dealers that it believes provide the most favorable prices and are capable of providing efficient executions. The Sub-Adviser may face a potential conflict of interest if it were to use client trades to obtain brokerage or research services. This conflict exists because the Sub-Adviser is able to use the brokerage or research services to manage client accounts without paying cash for such services, which reduces the Sub-Adviser's expenses to the extent that the Sub-Adviser would have purchased such products had they not been provided by brokers. Section 28(e) of the Exchange Act permits the Adviser or the Sub-Adviser to use brokerage or research services for the benefit of any account it manages. Certain accounts managed by the Sub-Adviser may generate soft dollars used to purchase brokerage or research services that ultimately benefit other accounts managed by the Sub-Adviser, including the Funds, effectively cross subsidizing the other accounts managed by the Sub-Adviser that benefit directly from the product. The Sub-Adviser may not necessarily use all of the brokerage or research services in connection with managing a fund whose trades generated the soft dollars used to purchase such products. The Sub-Adviser does not currently use Fund assets for, or participate in, third-party soft dollar arrangements or receive proprietary research from full service brokers. The Sub-Adviser also does not "pay up" for the value of any such proprietary research. If, in the future, the Sub-Adviser were to obtain brokerage and research services from broker-dealers, it would do so in arrangements that are consistent with Section 28(e) of the Exchange Act.

No brokerage commission information is provided since the Funds have not commenced operations prior to the date of this SAI.

#### **PROXY VOTING PROCEDURES**

The Board has delegated the responsibility of voting proxies with respect to the portfolio securities purchased and/or held by the Funds to the Adviser, subject to the Board's continuing oversight. The Adviser has delegated authority to vote proxies for the portfolio securities held by the Funds to the Sub-Adviser.

In exercising its voting obligations, the Sub-Adviser is guided by general fiduciary principles. The Sub-Adviser must act prudently, solely in the interest of the Funds, and for the purpose of providing benefits to the Fund. The Sub-Adviser will consider the factors that could affect the value of the Fund's investment in its determination on a vote.

The Sub-Adviser has engaged the services of Institutional Shareholder Services Inc. ("ISS") to make recommendations to the Sub-Adviser on the voting of proxies relating to securities held by the Funds. The Sub-Adviser has adopted the ISS Proxy Voting Guidelines. While these guidelines are not intended to be all-inclusive, they do provide guidance on the Sub-Adviser's general voting policies. The Sub-Adviser's use of the ISS Proxy Voting Guidelines is not intended to constrain the Sub-Adviser's consideration of any proxy proposal, and there may be times when the Sub-Adviser deviates from the ISS Proxy Voting Guidelines. The ISS Proxy Voting Guidelines are subject to change at the discretion of ISS and may be found at [issgovernance.com](http://issgovernance.com).

Each year, the Funds will make available the actual voting records relating to portfolio securities held by each Fund during the 12-month period ending June 30 without charge, upon request by calling 1-800-617-0004, on the Funds' website at <https://twinoaketfs.com> or by accessing the SEC's website at [www.sec.gov](http://www.sec.gov).

## **PAYMENTS TO FINANCIAL INTERMEDIARIES**

The Adviser and/or its affiliates, at their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Funds, their service providers or their respective affiliates, as incentives to help market and promote the Funds and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Funds, the Distributor or shareholders of the Funds through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing a Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about a Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in a Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

## **GENERAL INFORMATION**

### **Anti-Money Laundering Program**

The Funds have established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Funds' Program provides for the development of internal practices, procedures, and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that certain of its service providers have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, and conducting a complete and thorough review of all new account applications. The Funds will not transact business with any person or legal entity and beneficial owner, if applicable, whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

#### **Independent Registered Public Accounting Firm**

Cohen & Company, Ltd., located at 1350 Euclid Ave, Suite 800, Cleveland, OH 44115, is the independent registered public accounting firm of the Funds. The independent registered public accounting firm is responsible for conducting the annual audit of the Funds' financial statements. The selection of the independent registered public accounting firm is approved annually by the Board.

#### **Transfer Agent**

U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, Wisconsin 53202, serves as each Fund's transfer agent and dividend disbursing agent.

#### **Custodian**

U.S. Bank, N.A., 1555 North Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as custodian (the "Custodian") of each Fund's assets and is responsible for maintaining custody of each Fund's cash and investments and retaining sub-custodians, including in connection with the custody of foreign securities. Cash held by the Custodian, the amount of which may at times be substantial, is insured by the Federal Deposit Insurance Corporation up to the amount of available insurance coverage limits. The Custodian and Fund Services are affiliates.

#### **Administrator**

U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, Wisconsin 53202, serves as the administrator (the "Administrator") and provides various administrative and accounting services necessary for the operations of the Funds. Services provided by the Administrator include facilitating general Fund management; monitoring Fund compliance with federal and state regulations; supervising the maintenance of the Fund's general ledger, the preparation of the Fund's financial statements, the determination of NAV, and the payment of dividends and other distributions to shareholders; and preparing specified financial, tax, and other reports. The Custodian, the Distributor and the Administrator are affiliates.

No administration fee information is provided since the Funds had not commenced operations prior to the date of this SAI.

#### **Counsel**

Faegre Drinker Biddle & Reath LLP, One Logan Square, Suite 2000, Philadelphia, Pennsylvania 19103-6996, serves as counsel to the Trust.

#### **Registration Statement**

This SAI and the Prospectus do not contain all of the information set forth in the Registration Statement the Trust has filed with the SEC. The complete Registration Statement may be obtained from the SEC upon payment of the fee prescribed by SEC rules and regulations. A text-only version of the Registration Statement is available on the SEC's website, [www.sec.gov](http://www.sec.gov).

## **FINANCIAL STATEMENTS**

As the Funds had not commenced operations prior to the date of this SAI, there are no financial statements available at this time. Shareholders of the Funds will be informed of their Fund's progress through periodic reports when those reports become available. Financial statements certified by the independent registered public accounting firm will be submitted to shareholders at least annually.

## APPENDIX A

### DESCRIPTION OF SECURITIES RATINGS

#### **Short-Term Credit Ratings**

An **S&P Global Ratings** short-term issue credit rating is generally assigned to those obligations considered short-term in the relevant market. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

“A-1” – A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” – A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” – A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” – A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” – A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” – A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings – S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

“NR” – This indicates that a rating has not been assigned or is no longer assigned.

**Moody’s Investors Service (“Moody’s”)** short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

“P-1” – Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

“P-2” – Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

“P-3” – Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

“NP” – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

“NR” – Is assigned to an unrated issuer, obligation and/or program.

**Fitch, Inc. / Fitch Ratings Ltd. (“Fitch”)** short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention.<sup>1</sup> Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

“F1” – Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

“F2” – Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

1. A long-term rating can also be used to rate an issue with short maturity.

“F3” – Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

“B” – Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

“C” – Securities possess high short-term default risk. Default is a real possibility.

“RD” – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

“NR” – Is assigned to an issue of a rated issuer that are not and have not been rated.

The **Morningstar DBRS® Ratings Limited (“Morningstar DBRS”)** short-term obligation ratings provide DBRS Morningstar’s opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. The obligations rated in this category typically have a term of shorter than one year. The R-1 and R-2 rating categories are further denoted by the subcategories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by Morningstar **DBRS** for commercial paper and short-term debt:

“R-1 (high)” - Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” – Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” – Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” – Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” – Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” – Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” – Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events, and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” – Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” – Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” – A downgrade to “D” may occur when the issuer has filed under any applicable bankruptcy, insolvency or winding-up statute, or there is a failure to satisfy an obligation after the exhaustion of grace periods. Morningstar **DBRS** may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

### **Long-Term Issue Credit Ratings**

The following summarizes the ratings used by **S&P Global Ratings** for long-term issues:

“AAA” – An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

“AA” – An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

“A” – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

“BBB” – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” – Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

“BB” – An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

“B” – An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

“CCC” – An obligation rated “CCC” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

“CC” – An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” – An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

“D” – An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within the next five business days in the absence of a stated grace period or within the earlier of the stated grace period or the next 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring

Plus (+) or minus (-) – Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

“NR” – This indicates that a rating has not been assigned, or is no longer assigned.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

**Moody’s** long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of eleven months or more. Such ratings reflect both on the likelihood of default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by Moody’s for long-term debt:

“Aaa” – Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” – Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” – Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” – Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” – Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” – Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” – Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” – Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” – Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

“NR” – Is assigned to unrated obligations, obligation and/or program.

The following summarizes long-term ratings used by *Fitch*:

“AAA” – Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” – Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” – Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” – Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

“BB” – Securities considered to be speculative. “BB” ratings indicates an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” – Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present

“CCC” – A “CCC” rating indicates that substantial credit risk is present.

“CC” – A “CC” rating indicates very high levels of credit risk.

“C” – A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings but are instead rated in the “CCC” to “C” rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

“NR” – Is assigned to an unrated issue of a rated issuer.

The Morningstar DBRS long-term obligation ratings provide Morningstar DBRS’ opinion on the risk that investors may not be repaid in accordance with the terms under which the long-term obligation was issued. The obligations rated in this category typically have a term of one year or longer. All rating categories from AA to CCC contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by Morningstar DBRS for long-term debt:

“AAA” – Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” – Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” – Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” – Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” – Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” – Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” – Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” – A downgrade to “D” may occur when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods. Morningstar DBRS may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

### **Municipal Note Ratings**

An ***S&P Global Ratings*** U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

h Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and

h Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” – A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” – A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” – A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

“D” – This rating is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

**Moody’s** uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity.

For other short-term municipal obligations, Moody’s uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody’s uses the MIG scale for U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less.

#### MIG Scale

“MIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” – Is assigned to an unrated obligation, obligation and/or program.

In the case of variable rate demand obligations (“VRDOs”), Moody’s assigns both a long-term rating and a short-term payment obligation rating. The long-term rating addresses the issuer’s ability to meet scheduled principal and interest payments. The short-term payment obligation rating addresses the ability of the issuer or the liquidity provider to meet any purchase price payment obligation resulting from optional tenders (“on demand”) and/or mandatory tenders of the VRDO. The short-term payment obligation rating uses the VMIG scale. Transitions of VMIG ratings with conditional liquidity support differ from transitions of Prime ratings reflecting the risk that external liquidity support will terminate if the issuer’s long-term rating drops below investment grade.

Moody’s typically assigns the VMIG rating if the frequency of the payment obligation is less than every three years. If the frequency of the payment obligation is less than three years but the obligation is payable only with remarketing proceeds, the VMIG short-term rating is not assigned and it is denoted as “NR”.

“VMIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.

“VMIG-2” – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.

“VMIG-3” – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.

“SG” – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural and/or legal protections.

“NR” – Is assigned to an unrated obligation, obligation and/or program.

### **About Credit Ratings**

An **S&P Global Ratings** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Ratings assigned on **Moody’s** global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

**Fitch’s** credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issuer Default Ratings (IDRs) are assigned to corporations, sovereign entities, financial institutions such as banks, leasing companies and insurers, and public finance entities (local and regional governments). Issue-level ratings are also assigned and often include an expectation of recovery, which may be notched above or below the issuer-level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation’s documentation).

**Morningstar DBRS** offers independent, transparent, and innovative credit analysis to the market. Credit ratings are forward-looking opinions about credit risk that reflect the creditworthiness of an issuer, rated entity, security and/or obligation based on Morningstar DBRS’ quantitative and qualitative analysis in accordance with applicable methodologies and criteria. They are meant to provide opinions on relative measures of risk and are not based on expectations of, or meant to predict, any specific default probability. Credit ratings are not statements of fact. Morningstar DBRS issues credit ratings using one or more categories, such as public, private, provisional, final(ized), solicited, or unsolicited. From time to time, credit ratings may also be subject to trends, placed under review, or discontinued. Morningstar DBRS credit ratings are determined by credit rating committees.
